This week-long summer school provides a unique forum for a critical discussion on the reform of the EU economic governance framework. It will address the key institutional and legal issues of the new framework for EU's economic policy coordination and surveillance, including new policy modes, implementing and enforcement mechanisms, and accountability tools.

The course is designed for undergraduate and post-graduate students in law, economics and political science, as well as civil servants and legal practitioners who seek ways to enhance their professional skills by keeping up-to-date with global regulation issues.
