UNIVERSITY LEADERSHIP & STRUCTURE

The organization and operation of the University is defined by relevant Greek legislation. Athens University of Economics and Business is under the supervision of the Ministry of Education and Religious Affairs. Its organizational structure includes:

THE UNIVERSITY SENATE

The **Senate** consists of:

- the Rector
- the Vice Rectors
- the Deans of the Schools
- the Department Chairs
- one representative each of the Undergraduate students, the Master's students and the Doctoral students
- one representative each from the personnel categories of Special Teaching Staff, Laboratory Teaching Staff, Special Technical Laboratory Staff and Administrative Staff

The **Senate** is the highest collective decision-making body of the University.

SCHOOLS

The Athens University of Economics and Business consists of three Schools:

1. **SCHOOL OF ECONOMIC SCIENCES**, which supervises and coordinates the operation of the Department of International and European Economic Studies and the Department of Economics.
2. **SCHOOL OF BUSINESS**, which supervises and coordinates the operation of the Department of Management Science and Technology, the Department of Business Administration, the Department of Accounting and Finance and the Department of Marketing and Communication.
3. **SCHOOL OF INFORMATION SCIENCE AND TECHNOLOGY**, which supervises and coordinates the operation of the Department of Informatics and the Department of Statistics.

In accordance with Greek law, each School is governed by: (a) the General Assembly of the School, (b) the Dean's Council, and (c) the Dean of the School.

DEPARTMENTS

The Department is the University's basic educational and academic unit, which advances the development of science and knowledge in its relevant academic field, organizes and teaches the curriculum and ensures that it is continuously improved and updated. The Department consists of all the Professors, Associate Professors, Assistant Professors, Lecturers, members of the Special Teaching Staff, members of the Laboratory Teaching Staff and members of the Special Technical Laboratory Staff who serve in it.

The Departments of the Athens University of Economics and Business are:

1. International and European Economic Studies
2. Economics
3. Management Science and Technology

4. Business Administration
5. Accounting and Finance
6. Marketing and Communication
7. Informatics
8. Statistics

In accordance with Greek law, each Department is governed by: (a) the Departmental General Assembly, (b) the Administrative Board, and (c) the Department Chair.

UNIVERSITY STAFF

The University staff consists of the following categories:

-- TEACHING STAFF:

- The Teaching and Research Staff which consists of (a) Professors, (b) Associate Professors, (c) Assistant Professors, and (d) Lecturers.
- Special Teaching Staff.
- Laboratory Teaching Staff.
- Special Technical Laboratory Staff.
- Auxiliary Teaching Staff.
- Research Assistants.
- Adjunct Teaching Staff.
- Instructors on secondment.

-- ADMINISTRATIVE STAFF

SERVICES & FACILITIES

The Athens University of Economics and Business provides both administrative and other services (meals, housing, library, sport facilities, etc.) aimed at serving both its students and staff. More information on the organization and operation of the University's services can be found on the University's website (<http://www.aueb.gr/en>).

General description of the university

Athens University of Economics and Business (AUEB), as a Higher Educational Institution, is a legal entity governed by public law and supervised by the Ministry of Education and Religious Affairs.

AUEB is the third oldest Institution of Higher Education in the country and the first in the fields of Economics and Business Administration. During the course of its development, the scientific fields of Informatics and Statistics have been added. Since its founding in 1920 until today, AUEB has produced a rich and noteworthy tradition of significant academic achievements that characterize the present and create excellent prospects for the future.

The University, a center of excellence in academic research and teaching, is rated as one of the leading universities in Greece, and one of the best internationally, in the academic fields which it teaches. The University's reputation reflects, on the one hand, the high level of its scientific staff, the quality of its teaching and research and the modern curricula of its Departments and, on the other, the high-level training of its graduates which enables them to achieve professional success both in Greece and abroad.

List of undergraduate programmes leading to an academic degree

Athens University of Economics and Business offers the following curricula and corresponding specializations which lead to an undergraduate degree:

	DEPARTMENT CURRICULUM	SPECIALIZATIONS
1.	International and European Economic Studies	1. International Economics and Finance 2. International and European Political Economy
2.	Economics	1. Economic Theory and Policy 2. Business Economics and Finance 3. International and European Economics
3.	Management Science and Technology	1. Operations Research and Business Analytics 2. Operations and Supply Chain Management 3. Software and Data Analysis Technologies 4. Information Systems and Electronic Business 5. Strategy, Entrepreneurship and Human Resources
4.	Business Administration	1. Business Administration 2. Information Systems Management 3. Accounting and Financial Management 4. Marketing
5.	Accounting and Finance	1. Accounting 2. Finance
6.	Marketing and Communication	1. International Management, Innovation and Entrepreneurship 2. Human Resource Management 3. Business Analytics 4. Digital Marketing
7.	Informatics	1. Theoretical Computer Science 2. Computer Systems and Networks 3. Information Systems and Information Security 4. Databases and Knowledge Management 5. Operational Research and Economics of Information Technology 6. Computational Mathematics and Scientific Calculations
8.	Statistics	No specializations are offered

Detailed information about each Department's curriculum is provided in the Department's Undergraduate Prospectus and on its website.

Main University Regulations (including academic recognition procedures)

The University operates according to various sets of regulations, including:

- The University's Internal Regulations for Operation
- The Regulations for Administrative Services
- The Internal Regulations for Operation of the Master's and Doctoral Programs
- The Internal Regulations for postdoctoral research

- Regulations for Examinations

ECTS Coordinator of the University

The University's ECTS Coordinator is the Quality Assurance Chairperson, who ensures the University's compliance with the principles and rules of the European credit accumulation and transfer systems, supervises compliance and implementation and is responsible for the full recognition and transfer of credit units.

PART TWO: INFORMATION ABOUT THE INTERDEPARTMENTAL MASTER'S PROGRAMME IN FINANCE AND BANKING

A. GENERAL DESCRIPTION

The Interdepartmental Master's Programme entitled "Finance and Banking" has been offered since 1998 by the School of Economic Sciences of Athens University of Economics and Business (AUEB), with the option of either full-time or part-time studies.

In accordance with Greek law, the Programme is governed by:

1. The Special Interdepartmental Committee,
2. The Coordinating Committee, and
3. The Director of the Programme.

The field of studies of the Programme

The Interdepartmental **MSc Programme in Finance and Banking** aims at deepening the scientific knowledge and technical training of its students in the fields of **Finance and Banking**. The Programme specializes in these two areas of economics and focuses on them as follows:

a) In the **field of Finance**, the objective of the Programme is the specialization and training of students in the areas of valuation of securities, financial risks, optimal portfolio management, big data management in finance, forecasting, dividend policy and optimal financial structure of businesses, asymmetric information, regulation and efficiency of financial markets.

b) In the **field of Banking**, the Programme aims at the analysis and quantification of the risks of credit institutions, their credit policy and portfolio management, their regulatory framework at the European and international levels, the monetary policy and operation of central banks, as well as macroprudential policy for risks associated with extreme events.

c) In both of the above fields, the Programme provides all of the knowledge and techniques necessary to fully train the students.

The academic degree awarded

The Interdepartmental Master's Programme awards the degree of MSc in Finance and Banking.

Entrance requirements

To be accepted into the Interdepartmental Master's Programme, students are required to have an undergraduate degree from a Greek Institution of Higher Education, or an undergraduate degree from a foreign Institution of Higher Education which has been recognized by the Hellenic National Academic Recognition Information Center (NARIC), in accordance with the relevant provisions of Greek law.

Members of the staff categories of Special Teaching Staff, Laboratory Teaching Staff, and Special Technical Laboratory Staff are accepted into the Programme in addition to the prescribed number of admissions, in accordance with specifically defined provisions of Greek law.

The Interdepartmental Master's Programme "Finance and Banking" will accept up to 60 admissions into the full-time programme and up to 60 admissions into the full-time programme each academic year and is designed to employ 25 teaching staff.

The selection of students is carried out in accordance with the relevant Greek laws and the Operating Regulations of the Programme.

The documents required to apply to the Programme, which are included every year in the announcement stating that applications are being accepted, are the following:

- The application (electronically or in printed form) with a recent photograph.
- A copy of the undergraduate degree and a transcript of classes. Students in their final year of undergraduate studies must submit a statement (in accordance with Greek law 1599/86) that their acceptance into the Programme is contingent upon them having obtained their degree by the end of the upcoming September exam period.
- Certification of excellent or very good knowledge of the English language (at the C2 or C1 level). Students who do not have such certification when they submit their application must submit a statement (in accordance with Greek law 1599/86) that their acceptance into the Programme is contingent upon them acquiring the required certification of knowledge of English.
- Two letters of recommendation from professors (for candidates for full-time studies) and/or employers (for candidates for part-time studies).
- Verification of work experience (for candidates for part-time studies).

Candidates with a degree from a foreign Institution of Higher Education must submit a certificate from the Hellenic National Academic Recognition Information Center (NARIC) recognizing the equivalency of their degree.

The criteria for selection of candidates are listed in the announcement stating that applications are being accepted and include:

- The grade point average of the student's degree(s)
- The University or Department of origin
- Duration of studies (in years)
- The level of English language proficiency
- The duration and type of work experience (for the part-time programme)
- Letters of recommendation from professors or employers
- Personal interview (motivation, organization skills, focus of studies, etc.)
- Possession of a Master's degree

The selection procedure is described below. The Evaluation Committee:

- a) Prepares a complete list of all the applicants.
- b) Rejects the candidates who do not meet the minimum criteria.
- c) Invites the candidates who meet the minimum criteria, which have been decided by the Special Interdepartmental Committee, to an interview which is graded. The interview is conducted by at least two members of the Evaluation Committee.
- d) Ranks the candidates based on their final score and makes the final selection.

Expected Learning Outcomes / Objectives of the Programme

The objectives of the Programme are:

- 1) the scientific education, specialization and professional training of postgraduate students, executives of companies and organizations to meet the needs of the private and public sectors,
- 2) the provision of specialized knowledge to, and the development of technical skills in, scientists active in businesses, and financial and banking institutions.

The Programme provides a concentration in the areas of Finance and Banking which are not specializations and which are not listed on the transcript or the Diploma Supplement which the graduates receive.

Access to further studies/Career opportunities for graduates

Graduates of the Programme can continue their studies at the Doctoral Level or find employment in financial and banking institutions and other companies in the field to meet the needs of the private and public sectors.

The courses, with ECTS credits, for the full-time programme

The duration of studies for the full-time programme is **three semesters** which includes the time for preparing the Master's dissertation and submitting it for approval. In order to obtain the Master's degree, students are required to attend and pass examinations in four compulsory courses that have 7.5 ECTS credits each, three compulsory courses corresponding to 6 ECTS credits each, two elective courses that have 6 ECTS credits each, and prepare a Master's dissertation equivalent to 30 ECTS credits. The total number of credits needed to graduate is **90 ECTS credits**. The courses are taught in Greek and/or English.

The distribution of courses for the full-time programme, by semester, is shown in the table below.

COURSE CODE	COURSE	ECTS CREDITS
PREPARATORY COURSES		
m44202s	Mathematics	0
m12101s	Statistics	0
1ST SEMESTER		
m44103f	The Economics of Financial Markets	7.5

m12105s	Quantitative Methods	7.5
m44106s	Market Analysis & Portfolio Management	7.5
m44104f	Financial & Bank Accounting	7.5
2ND SEMESTER		
m44107s	Financial Derivatives	6
m44110s	Financial Management	6
m44108s	Bank Management and Risk Management	6
	Elective Course 1*	6
	Elective Course 2*	6
3RD SEMESTER		
m44111f	MASTER'S DISSERTATION	30

The courses, with ECTS credits, for the part-time programme

The duration of studies for the part-time programme is **four semesters** which includes the time for preparing the Master's dissertation and submitting it for approval. In order to obtain the Master's degree, students are required to attend and pass examinations in four compulsory courses that have 7.5 ECTS credits each, three compulsory courses equal to 6 ECTS credits each, two elective courses corresponding to 6 ECTS credits each, and either (a) prepare a Master's dissertation equivalent to 30 ECTS credits, or (b) attend and pass examinations in three courses with 10 ECTS credits each, in place of the dissertation. The total number of credits needed to graduate is **90 ECTS credits**. The courses are taught in Greek and/or English.

The part-time programme is aimed at candidates who are working. An application for the part-time programme may be accepted from a candidate who is not working, but who is unable to meet the full-time study obligations for a variety of reasons, such as health or family.

The distribution of courses by semester for the part-time programme, shown in the table below, is determined by the Programme's governing bodies and is included in the Programme's Studies Regulations.

COURSE CODE	COURSE	ECTS CREDITS
PREPARATORY COURSES		
m44202s	Mathematics	0
m44201p	Statistics	0
1ST SEMESTER		
m44103p	The Economics of Financial Markets	7.5

m44104p	Financial & Bank Accounting	7.5
2ND SEMESTER		
m44105p	Quantitative Methods	7.5
m44106p	Market Analysis & Portfolio Management	7.5
m44107p	Financial Derivatives	6
m44110p	Financial Management	6
3RD SEMESTER		
	Elective Course 1*	6
	Elective Course 2*	6
m44108p	Bank Management and Risk Management	6
m44217p	(Course instead of Dissertation) Information Systems and Management Strategies in Finance	10
4TH SEMESTER		
m44223p	(Course instead of Dissertation) Special Topics in Banking	10
m44224p	(Course instead of Dissertation) Special Topics in Finance	10
m44211p	MASTER'S DISSERTATION	30

Students in the part-time programme are given the option of attending and taking exams in three courses equal to 10 ECTS credits each, instead of writing a dissertation. The three courses are:

1. Special Topics in Finance
2. Special Topics in Banking
3. Information Systems and Management Strategies in Finance

Below is an indicative list of elective courses offered (full- and part-time programme):

- Companies' and Banks' Valuations and Mergers
- Credit Risk Management
- Financial Risk Management
- Topics in Finance and Investments
- Investments with Statistical and Computational Methods and Market Microstructure
- Game Theory and Strategic Decisions with Applications in Economics
- Statistical Learning and Big Data
- Information Technologies, Trading & Investment Strategies

The courses offered each year are decided upon by the Programme's Special Interdepartmental Committee following a recommendation by the Programme's Coordinating Committee.

It is possible for students to choose courses from other Master's Programmes in the School or in the University following a decision by Programme's Special Interdepartmental Committee, and the General Assembly or Special Interdepartmental Committee of the other Department/Programme.

Modification of the curriculum and redistribution of courses between semesters can be made following decisions of the governing bodies, in accordance with the Postgraduate Studies Regulations.

The Master's dissertation is mandatory for students in the full-time programme and is prepared during their 3rd semester, while for students in the part-time programme, it is not mandatory and, if they choose to do it, is prepared in their 4th semester.

Issues related to the writing of the dissertation (such as completion date, language, font, instructions for the summary, content, structure and presentation of the work, preparation of the bibliography, and so forth) are explained in the Guidelines for Preparation of the Master's Dissertation, which is issued by decision of the Special Interdepartmental Committee.

Students in the full-time programme can, within the context of their studies, do an **Internship** after approval of their request to the Special Interdepartmental Committee of the Programme, following approval by the Coordinating Committee, provided that there are internship positions available. The Internship will take place after the end of the teaching period, during the period when students are preparing their dissertations.

The tuition fees for attending the Interdepartmental Master's Programme are set at 5,400 euros for the full-time programme and 7,000 euros for the part-time programme and are paid in instalments over the course of studies in the Programme, on dates that are determined by the Special Interdepartmental Committee of the Programme.

The Programme can award scholarships or excellence awards to postgraduate students during the course of their studies, based on academic criteria, by decision of the Special Interdepartmental Committee.

Students who meet certain criteria determined by Greek law are entitled to exemption from tuition fees upon decision of the Department's General Assembly.

Final Examinations

Attending courses is mandatory. At the end of every teaching period, students take examinations in each course that was taught. The dates for the examination periods (regular and re-takes) are determined every academic year in accordance with the Academic Calendar and are announced at least ten days before the start of each semester.

Regulations regarding Exams and Assessment/Grading

- Class attendance is mandatory. A student whose absences exceed 1/3 of the teaching hours in a given course is considered to have failed the course and must repeat it the very next time that it is taught.

- The final evaluation in each course is conducted through written examinations. By decision of the Programme's Special Interdepartmental Committee, following a recommendation by the Coordinating Committee, course assignments can also be counted in the final evaluation.
- The composition of the final grade for each course is determined by the course instructor(s) and can include individual or team assignments. Participation in the examinations on the specific date announced in accordance with the Programme is mandatory.
- The grading scale ranges from zero (0) to ten (10), in increments of half or whole units. A grade of 5 and above is a passing grade.
- A student who fails to appear for the exam in a given course on the specified date, without excuse, loses that examination period and is considered to have failed the given course.
- Failure in more than two courses (cumulative) in the exams of all the semesters results in the student being dropped from the Programme.
- Students who fail in up to two courses in an examination period are entitled to enrol in the next semester but are required to be re-examined in these courses. If they do not pass all the courses in the re-take examination period, they are required to leave the Programme.
- The evaluation of the Master's dissertation is based on strict scientific criteria with regard to its originality, depth and analysis, composition and quality. If the student does not receive a passing grade on the dissertation, the student can be re-examined one additional time, not earlier than three months nor later than six months after the original examination. If the student does not receive a passing grade on the dissertation from the second examination, the student is required to leave the Programme, upon decision of the Programme's Special Interdepartmental Committee.
- To be awarded the Master's degree, a student must have received a passing grade in all the postgraduate courses and the dissertation. If this condition is not met within the stipulated deadline, the student is entitled only to a certificate verifying successful completion of the courses that were passed and the student's enrolment in the Programme ends.
- Postgraduate students complete their studies and are awarded the Master's Degree when they have fulfilled all the requirements of the Programme, which are successful examination in the courses of the Programme, approval of the dissertation and payment of tuition fees.
- The final grade for the Master's degree (MSc) is the average of the grades for the postgraduate courses and the grade for the dissertation.
- The grade awarded to the Master's degree (MSc) certifies the successful completion of the postgraduate student's studies. The MSc degree which the student is awarded carries the designation of Good, Very Good, or Excellent which correspond to:

⇒ "Excellent" from 8.51 to 10,

⇒ "Very Good" from 6.51 to 8.50, and

⇒ "Good" from 5 to 6.50.

Financial Applications Laboratory

Students in the Interdepartmental Master's Programme in Finance and Banking have access to a fully-organized lab which provides a modern network of 19 work stations and is equipped with specialized software and databases which help not only in teaching the subject areas of finance and banking but also in the statistical processing and analysis of data with a complete series of statistical, mathematical and econometric packages and applications.

A series of lectures and educational seminars are conducted in the lab of the postgraduate programme, as well as in the applied labs in the main building of the University.

In addition, the students in the Programme are provided with:

- Educational Seminars:
 - Reuters seminar
 - Bloomberg seminar
 - Introduction to SQL and Databases for Financial Applications

- Direct access to and practice with a series of databases, such as:
Bloomberg
Reuters Eikon / DataStream

- Direct access to econometric packages for data analysis, such as:
EViews, Stata, R, MATLAB, SQL, SPSS, GAMS

- Access via the AUEB network to electronic journals and electronic databases.

The applied lab of the postgraduate programme is housed in AUEB's Postgraduate Studies and Research Building, located at 47A Evelpidon & 33 Lefkados Streets, 6th floor, Room 610.

Certification by the CFA Institute University Recognition Program

The Interdepartmental Master's Programme in Finance and Banking has been accepted into the **CFA Institute University Recognition Program**. Through this recognition, the international organization **CFA® (Chartered Financial Analysts)** certifies that the Master's programme offers a curriculum which is consistent with the requirements of the Institute for the acquisition of the internationally-established professional title which is awarded by the **CFA® Institute**. As such, the Interdepartmental Master's Programme is eligible to award up to three scholarships per academic year within the framework of the CFA Program Awareness Scholarships, to students who wish to take the exam to earn professional certification from the CFA. Scholarships take the form of partial exemption from the examination fees for certification.

The professional title awarded by the **CFA® Institute** has been recognized by the Hellenic Capital Market Committee and the Athens Stock Exchange and entitles the titleholders to exemption from the

corresponding exams that are held in Greece. In the private sector, possession of this title from the **CFA® Institute** carries special weight and is an important qualification for all those who work or wish to work in investment, banking and, more generally, in the wider financial sector. Students in the Interdepartmental Master’s Programme in Finance and Banking, in addition to the thorough academic training received in the subjects that are analysed in the curriculum, are prepared as well to attain a highly prestigious professional certification, thus acquiring a significant advantage in the labour market.

Description of Individual Courses

Full Time program

Preparatory courses

Course title	Mathematics
Course code	m44202s
Type of course	Preparatory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	1st
Number of credits allocated	0
Name of lecturer	Gatsios Konstantinos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of the course is to provide students with the necessary mathematical tools employed in the teaching of main courses of the Programme and used in the related literature, as well as to familiarize them with the application of mathematics in addressing economic problems.
Prerequisites	None.
Course contents	The topics covered by the course are: functions and equations; the time value of money (the present and the future value of money); matrices (matrix operations, transposes and inverses, determinants, Cramer’s Rule); differential calculus (derivatives, rules of differentiation; Taylor Series expansion, maxima and minima of functions of one and of more than one variables, optimization with and without constraints); integral calculus (rules of integration, definite and indefinite integrals, improper integrals).
Recommended reading	Basic:

	Chiang A.: Fundamental Methods of Mathematical Economics, 3rd Edition, McGraw-Hill Watsham, J. T. and Parramore, K.: Quantitative Methods in Finance Additional: Silberberg E.: The Structure of Economies: A Mathematical Analysis, Mc Graw Hill Hands D. W.: Introductory Mathematical Economics
Teaching methods	Lectures, assignments.
Assessment methods	Exercise solving (there is no final examination or marking)
Language of instruction	Greek

Course title	Statistics
Course code	m44201s
Type of course	Preparatory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	0
Name of lecturer	Demos Antonios, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The main objective of the course is to remind student the basic notions in statistics so that they would be able to follow a course in Quantitative Analysis or Finance.
Prerequisites	None.
Course contents	Random Variables and their Probability Distributions: Discrete and Continuous Random Variables. Joint Distributions, Conditional Distributions, and Independence. Features of Probability Distributions: Expected Value, Median, Variance, Standardizing a Random Variable. Features of Joint and Conditional Distributions, Covariance, Correlation, Variance of Sum of Random Variables, Conditional Expectation. The Normal and Related Distributions. Population, Parameters, and Random Sampling. Finite Sample Properties of Estimators. Interval Estimation and Confidence Intervals: Confidence Intervals for the Mean from a Normally Distributed Population.
Recommended reading	Tsionas, Statistics with Economic Applications, AUEB (in Greek). Chalikias, Statistics, Rosili (in Greek). Chatzinikolaou, Statistics for Economists, (in Greek). Studenmund: Using Econometrics, Addison, Wesley, Longman

	Wooldridge: Introductory Econometrics, Thomson. <i>Heij, et al.: Econometric Methods with Applications</i> Notes: www.aueb.gr/users/demos/mbasta.pdf
Teaching methods	Lectures coupled with exercise solving and introduction to statistical analysis with R or e-views.
Assessment methods	Exercise solving (there is no final examination or marking)
Language of instruction	Greek/English

Compulsory Courses

Course title	Economics of Financial Markets
Course code	m44103f
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	7,5
Name of lecturer	Economides George, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The main goal of the course is for students to understand the relationship between the banking system and the financial markets. It focuses on how the liquidity in an economy is shaped, and what is the role of the commercial banking system in this process. The determinants of money supply are presented, whereas the various monetary policy tools as well as the role of a Central Bank are discussed. The money demand process is analyzed as well as the transmission mechanisms of monetary policy. Special attention is given to the presentation of the ECB and the Eurosystem.
Prerequisites	None
Course contents	<ol style="list-style-type: none"> 1. Why study Money, Banking and Financial Markets? An overview of the financial system. What is Money? 2. Multiple Deposit Creation and the Money Supply Process. Determinants of the Money Supply. Tools of Monetary Policy. What should Central Banks Do? Monetary Policy Goals, Strategy and Tactics. 3. The Demand for Money. The IS-LM model. Monetary and Fiscal Policy in the IS-LM model. Aggregate Demand and Supply Analysis. 4. Transmission Mechanisms of Monetary Policy: The Evidence. 5. Money and Inflation.

	<p>6. Rational Expectations: Implications for policy.</p> <p>7. The Foreign Exchange Market. The International Financial System.</p>
Recommended reading	<p>Mishkin S. F. [2013]: The Economics of Money, Banking and Financial Markets, 10th edition, Pearson Education, Inc., Boston.</p> <p>Begg D., S. Fischer and R. Dornbusch [2005]: Economics, McGraw-Hill, London, 8th edition.</p> <p>Blanchard O., A. Amighini and F. Giavazzi [2010]: Macroeconomics-A European Perspective, Prentice Hall International, Inc., New Jersey.</p>
Teaching methods	Teaching in the class with physical presence and the use of slides.
Assessment methods	Final exam (100%).
Language of instruction	Greek/English

Course title	Financial Reporting and Analysis
Course code	m44104f
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	1st
Number of credits allocated	7,5
Name of lecturer	Siougle Georgia, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>The aim of the course is to guide students in the area of Financial Reporting. The students taking this course should be able to evaluate alternatives and base their decisions by having a good understanding about the concepts and techniques of IFRS reporting practices. The key accounting issues will be explained considering rapid changes in the economic environment and global markets.</p>
Prerequisites	NO
Course contents	<p>Key components of financial reporting are discussed:</p> <ul style="list-style-type: none"> ❖ Financial Reporting and Accounting Standards ❖ Conceptual Framework for Financial Reporting ❖ Statement of Financial Position and Statement of Cash Flows ❖ Cash and Receivables ❖ Valuation of Inventories

	<ul style="list-style-type: none"> ❖ Depreciation, Impairment and Depletion ❖ Intangible Assets ❖ Investments ❖ Revenue Recognition ❖ Accounting for Leases ❖ Statement of Cash Flows
Recommended reading	<p>Core Text : Intermediate Accounting : IFRS Edition (3rd edition) Kieso, Weygandt, Warfield</p> <p>Case Studies</p> <p>Furthermore, the course material consists of slides and other material made available electronically or in hardcopy.</p>
Teaching methods	Lectures, Tutorials, Case Studies
Assessment methods	Written Exams-100 %
Language of instruction	Greek

Course title	Capital Markets & Portfolio Management
Course code	m44106s
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	7,5
Name of lecturer	Tzavalis Elias, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>The aim of this course is to introduce students to the modern tools of investment analysis and appraisal, including investment decision under certainty and under uncertainty, pricing of risk, portfolio management, and asset pricing. It also covers topics on pricing fixed income securities, the term structure of interest rates and bond portfolio management. The course includes demonstrations/applications of the above techniques using computer software to see how they can be used, in practice. At the end of the course, the students would have learned the tools of the modern investment analysis and become familiar with their application, in practice.</p>
Prerequisites	

Course contents	Investment decisions under certainty, Investment decisions under uncertainty, Mean-variance portfolio analysis, The Capital Asset Pricing Model, Factor models and the Arbitrage Pricing Theory, Bond Markets, The term structure of interest rates: theory and practice, Bond portfolio management and International capital markets and portfolio management.
Recommended reading	Bodie Z., A. Kane and A. Marcus (2009), Essentials of Investments Copeland T. and J. Weston and K. Shastri (2005), Financial Theory and Corporate Policy Danthine J. and Donaldson (2002), Intermediate Financial Theory Fabozzi, F., Kolm. P., Pachamanova, D and Focardi, S. (2007), Robust Portfolio Optimization and Management, Wiley. Fabozzi F. (2016), Bond Markets, Analysis and Strategies, Pearson Luenberger D. (1999), Investment Science
Teaching methods	Lecturing, laboratory practicals, tutorials and external seminars
Assessment methods	Written exam and assignments
Language of instruction	Greek / English

Course title	Quantitative Methods
Course code	m44105s
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	7,5
Name of lecturer	Demos Antonios, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The lectures target to familiarize the class participants with the basic theoretical principles and the understanding of financial models. The objective of the applications is to familiarize the students with the various estimation techniques, applied on real data, on the areas of Economics and Finance.
Prerequisites	At least one undergraduate course in Econometrics and/or Introduction to Statistics.
Course contents	Random Variables. Covariance-Correlation dependence of random variables. Hypothesis Testing. Linear Regression and hypothesis testing.

	Economic Applications, with emphasis on CAPM. Transformations of random variables and introduction of dummy variables. Misspecification (autocorrelation, heteroskedasticity). Economic significance of heteroskedasticity with emphasis on portfolios and fund formation. GMM and Maximum Likelihood. Binary dependent variables (Logit, Probit). Introduction to time series with emphasis on GARCH and VAR models.
Recommended reading	C. Heij, P. et al, Econometric Methods with applications in business and economics, Cambridge University Press. J. Johnston and J. DiNardo, Econometric Methods, McGraw-Hill E. Tzavalis Econometrics (in Greek) A. Demos: Financial Econometrics (in Greek)
Teaching methods	Lectures, where econometric notions and models are thoroughly presented. The applications part, where various econometric packages are employed such as, R (additional seminars), Stata, Eviews, etc. with real or simulated data
Assessment methods	20% written project 80% written exam.
Language of instruction	Greek/English

Course title	Banking and Risk Management
Course code	m44108s
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Sakellaris Plutarchos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	By the course end, the students should be able to: <ul style="list-style-type: none"> • master the fundamentals of risk management (except for credit risk management) as well of compliance to bank regulatory procedures. • Identify and measure risk exposure for a FI, applying methods such as Value-at-Risk (VaR) and Expected Shortfall. • Understand and implement hedging strategies to offset portfolio and asset risk positions using derivative instruments such as futures, forwards, options, and swaps.
Prerequisites	

Course contents	The financial crisis that erupted in 2007 has demonstrated the importance of recognizing and managing the multiple risks with which Financial Institutions (FI) are faced. This course provides an integrated approach to managing risks faced by FIs: their recognition, measurement and mitigation. We place emphasis on the role that derivative products play in mitigating risk. We cover both internal systems as well as external rules of prudential supervision. We examine solutions to the deficiencies that led to failures in both self-regulation of FIs as well in their official supervision.
Recommended reading	J. C. Hull, Risk Management and Financial Institutions, (Wiley Finance), 5th edition, 2018 A. Saunders and M. M. Mylonas, Derivative Products and Markets, Hellenic Banks Association and Dardanos, 2005 (In Greek) Steve Allen, Financial Risk Management: A Practitioner's Guide to Managing Market and Credit Risk (Wiley Finance), 2nd edition, 2013.
Teaching methods	Lectures, assignments, guest lectures by industry practitioners, laboratory sessions.
Assessment methods	Problem sets, assignments, exams.
Language of instruction	Greek

Course title	Financial Derivatives
Course code	m44107s
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Topaloglou Nikolaos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of this course is to introduce students to the theoretical and practical aspects of financial derivatives.

	<ul style="list-style-type: none"> Specifically, the course examines the pricing and use of financial derivatives including options, forward contracts, futures contracts, swaps and credit derivatives. The course will extensively focus on the theory and applications of derivatives in speculation and risk management. Moreover, the course includes a computational demonstration of the pricing models with excel.
Prerequisites	
Course contents	The course covers the main financial derivatives: futures and futures on various underlying values. Options on shares, indices, currencies and futures. Interest rate swaps and foreign exchange. The focus of the analysis are pricing and hedging derivatives or derivatives positions by financial institutions. Special topics covered include, inter alia, the Black - Scholes model, binomial trees, hedging deltas, as well as various applications such as real rights in finance.

Teaching methods	Lectures, assignments
Assessment methods	Problem sets, assignments, exams.
Language of instruction	Greek/English

Course title	Corporate Finance
Course code	m44110f
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	2 nd
Number of credits allocated	6
Name of lecturer	Pagratris Spyros, Assistant Professor

<p>Objective of the course (preferably expressed in terms of learning outcomes and competences)</p>	<p>Corporate Finance is one of the seven core courses of the program. Students taking this course should be able to:</p> <ol style="list-style-type: none"> 1. Identify turning points in economic policy that could have a material impact on funding conditions and corporate decisions to access external financing. 2. Navigate in the new era of extraordinary policy interventions by central banks that have a profound impact on asset valuations and the cost of corporate financing. 3. Value investment projects, conduct capital budgeting exercises, and identify factors that affect corporate decisions to access different forms of financing. 4. Assess alternative ways of accessing capital markets. 5. Identify issues of first-order importance that are relevant to corporate financing, combine them to make informed decisions and negotiate funding terms with financiers.
<p>Prerequisites</p>	<p>The course <i>Capital Markets and Portfolio Management</i> is prerequisite.</p>
<p>Course contents</p>	<p>Session 1. A primer on money creation in a modern economy</p> <ul style="list-style-type: none"> • Quantitative Easing (QE) and asset valuations. • Quantitative Tightening (QT) and capital market turbulence. A view to the future. • Long-term refinancing operations, targeted operations, credit easing, outright monetary operations (OMT) and the Covid-19 pandemic emergency programs. <p>Session 2. Capital Structure: Optimal debt-equity choice.</p> <ul style="list-style-type: none"> • Empirical patterns of corporate financing and possible explanations. • Types of financial instruments and markets. • Modigliani-Miller irrelevance proposition. An options-based approach to debt and equity valuations. The weighted average cost of capital (WACC) and WACC fallacies. • Capital structure under financial frictions. Taxes, financial distress costs and the static trade off (STO) in practice. • Debt-overhang: The underinvestment problem and the role of financial restructuring. • Equity capital raising and the mechanics of rights issues. • Incentives, asymmetric information and the pecking-order of financing choices. <p>Session 3. Business plans: Risk, return, and free cash flow analysis</p> <ul style="list-style-type: none"> • WACC and the internal rate of return (IRR) in practice.

	<ul style="list-style-type: none"> • Data sources: Equity risk premium (ERP), marginal tax rates, sectoral betas and growth rates on operating income (EBIT). • Free cash flow analysis: Working capital, sunk costs, tax shields (amortization-depreciation and interest costs).
<p>Recommended reading</p>	<p><i>The course packet</i> contains an extensive set of self-contained slides (approx. 170 slides) that are structured in three main sections, following the section list above. It also includes articles from business press (that students need to follow closely). These are optional but recommended to those students without prior exposure to finance.</p> <p><u>Auxiliary textbooks:</u></p> <ol style="list-style-type: none"> 1. Brealey, Myers, and Allen. "Principles of Corporate Finance", McGraw-Hill, New York, NY. 2. Jean Tirole. "The Theory of Corporate Finance", Princeton University Press. 3. Financial Times (November 26, 2019), "Repo: How the financial markets' plumbing got blocked. Available at https://ig.ft.com/repo-rate/ 4. Norelli A. and B. Merrill, "Quantitative Tightening: Many Moving Parts," J.P. Morgan Asset Management (Nov 2, 2017). Available at: https://blog.jpmorganinstitutional.com/2017/11/quantitative-tightening-many-moving-parts/ 5. McLeay M, Radia A., and R. Thomas, "Money creation in the modern economy," Bank of England Quarterly Bulletin (2014 Q1). Available at: https://www.bankofengland.co.uk/quarterly-bulletin/2014/q1/money-creation-in-the-modern-economy
<p>Teaching methods</p>	<p>Lecturing will be supported by video presentations, in-class case analyses, and occasional invited lectures by market experts. Students are expected to be prepared for class at all times and to contribute to class discussions.</p>
<p>Assessment methods</p>	<p>The course is evaluated through one final exam that counts for 100% of the course grade. The final exam is closed books and closed notes and lasts for 2 hours. It covers material from the entire course, including occasional invited lectures. Students are encouraged to use a calculator for the exam. This element is geared towards assessing students' ability to present concisely and quantitatively credible solutions to explicit corporate finance problems.</p>
<p>Language of instruction</p>	<p>English/Greek</p>

Elective Courses

Course title	Companies' and Banks' Valuations, Mergers and Acquisitions
Course code	m44225f
Type of course	Elective
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Liapis Konstantinos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>The objective of the course are the valuations and the mergers & acquisitions of companies and Banks. Issues such as: corporate finance, capital and alternative investments, financial reporting systems, business groups, capital structure and operations decisions, acquisition methods and strategies, corporate restructuring, stock valuations, terms of m&a's transactions and shareholders' agreements.</p> <p>The desired learning outcomes are a full understanding of the concepts, tools, and methods of valuing companies as well as technical mergers & acquisitions, they will also be able to apply the above knowledge, tools, and methods in practice.</p>
Prerequisites	Without being a prerequisite, an introductory course in Accounting or Financial Analysis would be helpful.
Course contents	<p>Thematic units of the course are:</p> <ul style="list-style-type: none"> • Valuation, financial analysis, and corporate financing. • Methods of capital structure, equity valuation and price changes in stock markets after changes in capital • Accounting forecasts, provisions, and adjustments to the financial statements • Business plans and proforma financial statements • The types, methods and techniques of mergers and acquisitions • Business Mergers and Inter-Corporate Investments • Consolidation accounting • Global operations, multinational corporations (MNEs) and banks (MNBs) • Decision making for equity investments • Mergers and acquisitions and corporate restructuring • Venture capital

Teaching methods	Lectures – discussions, case studies, methods’ applications using excel
Assessment methods	Homework’s per thematic unit, during the lectures: 40% of the final grade Final exam at the end of the course: 60% of the final grade.
Language of instruction	Greek and English

Course title	Credit Risk Management
Course code	m44213f
Type of course	Elective
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Topaloglou Nikolaos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>By the course end, the students should be able to:</p> <ul style="list-style-type: none"> • Master the fundamentals of credit risk management as well of compliance to bank regulatory procedures. • Pricing of credit and interest rate derivatives • Master the fundamentals of hedging the interest rate risk using derivatives

Prerequisites	
Course contents	The first section presents standard interest rates models. These are then used in practice to price option or futures on Treasury Bills and Bonds, as well as interest caps and floors. They can also be used to hedge against risky debt. Having introduced the above tools, the second section the course makes an introduction to the credit risk, credit ratings, estimation of default probabilities, calculates the credit risk on debt instruments, presents credit risky bonds, credit default swaps, futures and options on credit default swap spreads, options on swaps, and finally introduces the mortgage-backed securities. The latter can be found very useful for practitioners in the markets for their every day activities, while students will learn all the necessary tools for credit risk management.

Course title	Financial Risk Management
Course code	m44214f
Type of course	Elective
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Synodinos Ioannis

Objective of the course (preferably expressed in terms of learning outcomes and competences)	The educational aim of the course is to provide an integrated overview of the models of asset dynamics for different risk types (Equities, Interest Rates, FX & Credit) and the key techniques of identification, measurement and management of financial risk.
Prerequisites	A working knowledge of basic financial and statistical concepts strongly recommended. Working knowledge of derivatives a plus.
Course contents	Part 1: review of basic concepts of securities and derivatives Part 2: theory of risk (statistics and metrics) Part 3: Value at risk: Historical simulation, parametric evaluation and Monte Carlo simulation
Recommended reading	Jorion, Value at Risk Luenberger, Investment Science Crouhy, Risk Management
Teaching methods	Lectures and worked examples. Spreadsheet with built-in calculators to be provided on-line
Assessment methods	2 extended exercises (0 – 20% of the grade each); 1 final exam (60% - 100% of the grade)
Language of instruction	Greek / English

Course title	Special Issues in Finance and Investments
Course code	m44224f
Type of course	Elective
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Tzavalis Elias - Topaloglou Nikolaos, Professors
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of this course is to present a number of risk management and investment applications to the students, which are used in practice. It covers topics in international portfolio risk management and currency risk, mutual funds and portfolio performance evaluation, Investments strategies and value at risk (VaR) applications. At the end of the course, the students will have become familiar with techniques and concepts on international investing risk management

	procedures and diversification, performance evaluation procedures and security selection, investment strategies accounting for taxes and inflation, investor constraints, investment policies and VaR procedures. VaR procedures for asset portfolios and loans management will be demonstrated through an econometric package.
Prerequisites	
Course contents	To course covers the topics: 1. International portfolio management and investing (Currency risk, forward markets, CIRP and UIRP, PPP, ICAPM, pricing currency risk, home bias) 2. Performance evaluation and active portfolio management (Risk-adjusted returns, style analysis, portfolio performance evaluation metrics, active portfolio management, security selection (the Treynor-Black model), portfolio construction and alternative optimization techniques) 3. Investment strategies and processes (Strategies accounting for Taxes and inflation, Social Security, Investor constraints, investment policies Expected utility, risk aversion, certainty equivalence and risk, stochastic dominance). 4. VaR (Value-at-Risk VaR) applications (Applications of VaR to stock, bond and foreign exchange Portfolios, economic capital, and credit, liquidity and operational risks)

Course title	Game Theory & Strategic Decisions: with applications in Economics
Course code	m44212f
Type of course	Elective
Level of course	Postgraduate

Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Gatsios Konstantinos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The chief purpose of this course is to enable the student to set up, study and solve games, especially games that arise in business and economics. To acquire a taste of the type of situations we would be interested in as well as the type of questions we would be asking, think of the following “real-life” situation.
Prerequisites	It does not require knowledge of economics (or any other science), despite the fact that it is necessary for an in-depth understanding of many economic (and not only) problems. The use of mathematical tools in the course is also quite limited.
Course contents	This course is designed for people in business, for managers. It is as theoretical as necessary for providing an introduction to the science of game theory; and practical in that it offers many applications and case studies to make it attractive to managers in both the commercial and non-profit sectors, as well as to students in business.
Recommended reading	Prajit K. Dutta, <i>Strategies and Games, Theory and Practice</i> , MIT Press. Osborne, M: <i>An Introduction to Game Theory</i> , εκδ. Κλειδάριθμος. Gibbons, R: <i>A Primer in Game Theory</i> , 1992
Teaching methods	Lectures, assignments, laboratory sessions.
Assessment methods	75% Exams, 20% homework, 5% participation in the course
Language of instruction	Greek

Course title	Large Data and Statistical Learning
Course code	m44227s
Type of course	Elective
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2st
Number of credits allocated	6

Name of lecturer	Papailias Fotis
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>After successful completion of this course the students must have a good understanding of:</p> <ul style="list-style-type: none"> • computational inference, • time series forecasting, • data features (seasonalities, nonstationarities, etc.), • how machine learning methods work (supervised and unsupervised machine learning). <p>Furthermore, students are expected to obtain the necessary skills to be able to:</p> <ul style="list-style-type: none"> • use scientific software and develop codes independently, • collect, handle and organise large panels of data, • visualise data and extract features, • apply machine learning techniques in practice and interpret the output in economic and finance applications.
Prerequisites	None formal pre-requisite, a basic level of maths/stats and econometrics is required.
Course contents	<p>This course is designed to introduce students to the concepts of large data handling and analysis with machine learning techniques. We start with computational analysis and inference and discuss the Monte Carlo, Bootstrap, k-fold cross-validation and recursive and rolling estimation methodologies. We provide a solid basis for time-series forecasting based on predictive linear regressions as well as using the Kalman Smoother. Next, we discuss large data handling techniques and discuss its features (seasonalities, nonstationarities). We discuss how unsupervised machine learning methodologies (k-means clustering, principal component analysis and dynamic factor analysis) could be applied in economics and finance forecasting applications (including the construction of Financial Conditions Indexes and Uncertainty Indicators). Next, we introduce the penalised regression methodologies of ridge, lasso and elastic net. We extend our discussion to unbalanced datasets and use bridge equations, MIDAS and U-MIDAS models as suggested remedies. Finally, our special topics include adaptive learning and modelling and applications of machine learning in portfolio selection.</p> <p>On top of our theory discussions, the course has a “hands-on” approach where all these methods applied in real data using the R Project for Statistical Analysis as the main scientific software.</p>
Recommended reading	<p>Main reading: supplied material.</p> <p>Supplementary readings include:</p> <ul style="list-style-type: none"> • James, G., Witten, D., Hastie, T., Tibshirani, T. (2013). 	<ul style="list-style-type: none"> • Sheppard, K. (2020). Financial Econometrics Notes. University of Oxford. <p>And various academic papers discussed throughout the module.</p>
Teaching methods	<ul style="list-style-type: none"> • Weekly lectures (theory & hands-on), • Weekly tutorials (theory & hands-on) • Learning-by-doing approach.
Assessment methods	<p>Weights in squared brackets.</p> <ul style="list-style-type: none"> • [10%] Weekly Assignments, • [30%] Project 1 (essay and code), • [30%] Project 2 (essay and code), • [30%] Final Exam.
Language of instruction	English (occasional use of Greek).

Course title	Information Technologies, Trading & Investment Strategies
Course code	m44109p
Type of course	Elective
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Skouras Spyros, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	After the completion of the course the students will have an understanding of the activities of a financial institution's treasury department. They will acquire fundamental knowledge and skills on using financial databases, on trading mechanisms, on theoretical and empirical issues of different financial instruments, their valuation methodology, and their uses in risk and portfolio management. They will also gain experience in trading simulated securities in Bloomberg and Thomson Reuters EIKON Terminals.
Prerequisites	The MSc's compulsory courses are adequate preparation.
Course contents	Getting familiar with Thomson Reuters EIKON and BLOOMBERG platforms. Basic concepts of using financial databases and handling/analyzing financial data. Applied portfolio theory: asset pricing models and trading strategies. Portfolio management using derivatives.

Part Time program

Preparatory courses

Course title	Mathematics
Course code	m44202s
Type of course	Preparatory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	1st
Number of credits allocated	0
Name of lecturer	Gatsios Konstantinos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of the course is to provide students with the necessary mathematical tools employed in the teaching of main courses of the Programme and used in the related literature, as well as to familiarize them with the application of mathematics in addressing economic problems.
Prerequisites	None.

Course contents	The topics covered by the course are: functions and equations; the time value of money (the present and the future value of money); matrices (matrix operations, transposes and inverses, determinants, Cramer's Rule); differential calculus (derivatives, rules of differentiation; Taylor Series expansion, maxima and minima of functions of one and of more than one variables, optimization with and without constraints); integral calculus (rules of integration, definite and indefinite integrals, improper integrals).

Compulsory Courses

Course title	Economics of Financial Markets
Course code	m44103f
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	7,5
Name of lecturer	Economides George, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The main goal of the course is for students to understand the relationship between the banking system and the financial markets. It focuses on how the liquidity in an economy is shaped, and what is the role of the commercial banking system in this process. The determinants of money supply are presented, whereas the various monetary policy tools as well as the role of a Central Bank are discussed. The money demand process is analyzed as well

	as the transmission mechanisms of monetary policy. Special attention is given to the presentation of the ECB and the Eurosystem.
Prerequisites	None
Course contents	<ol style="list-style-type: none"> 8. Why study Money, Banking and Financial Markets? An overview of the financial system. What is Money? 9. Multiple Deposit Creation and the Money Supply Process. Determinants of the Money Supply. Tools of Monetary Policy. What should Central Banks Do? Monetary Policy Goals, Strategy and Tactics. 10. The Demand for Money. The IS-LM model. Monetary and Fiscal Policy in the IS-LM model. Aggregate Demand and Supply Analysis. 11. Transmission Mechanisms of Monetary Policy: The Evidence. 12. Money and Inflation. 13. Rational Expectations: Implications for policy. 14. The Foreign Exchange Market. The International Financial System.

Teaching methods	Teaching in the class with physical presence and the use of slides.
Assessment methods	Final exam (100%).
Language of instruction	Greek/English

Course title	Financial Reporting and Analysis
Course code	m44104p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	1st
Number of credits allocated	7,5
Name of lecturer	Anagnostopoulou Seraina, Associate Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	At the end of the course, students will have a hands-on understanding of the most important elements of a set of financial statements, and should be able to use this information for financial

	decision-making. They should also be able to perform basic financial statements analysis into the accounts of a company, and understand the fundamental factors that shape and can deteriorate the quality of earnings, and financial reporting quality more generally.
Prerequisites	None
Course contents	The course introduces students into the key concepts and elements of financial accounting in detail (assets, liabilities and shareholders' equity), and also aims at helping them make decisions as future users of financial statements. The course further covers more specialised topics in accounting, such as topics that relate to the quality of earnings, and the basic elements of financial statements analysis, in addition to the coverage of topics on accounting for depreciation, impairment, uncollectible accounts and provisions, inventory, financial assets and liabilities, and the calculation of cash flows. Financial reporting concepts are presented according to the provisions of the International Financial Reporting Standards (IFRS).
Recommended reading	<ul style="list-style-type: none"> • Financial Accounting, Harrison, Horngren, Thomas, 10E/11 • Intermediate Accounting-IFRS Edition, Kieso, Weygandt, Warfield, 2E/3E, Wiley • Financial Statement Analysis, Subramanyam, 11E, McGraw-Hill • Business Analysis and Valuation-IFRS Edition, Palepu, Healy, Peek, 5E, Cengage
Teaching methods	<ul style="list-style-type: none"> • Face to face teaching (remote teaching also possible) • Use of Power Point, and online learning platform Eclass • Both lecture participation and independent study are required
Assessment methods	Compulsory written exam at the end of the semester. This involves providing answers to exercises, problems and case studies, using numerical data, and a critical evaluation and discussion of the results, and also possible answers to multiple choice questions and theoretical questions.
Language of instruction	Greek/English

Course title	Capital Markets & Portfolio Management
Course code	m44106p
Type of course	Compulsory

Level of course	Postgraduate
Year of study	1 st
Semester/trimester	2 nd
Number of credits allocated	7,5
Name of lecturer	Tzavalis Elias, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of this course is to introduce students to the modern tools of investment analysis and appraisal, including investment decision under certainty and under uncertainty, pricing of risk, portfolio management, and asset pricing. It also covers topics on pricing fixed income securities, the term structure of interest rates and bond portfolio management. The course includes demonstrations/applications of the above techniques using computer software to see how they can be used, in practice. At the end of the course, the students would have learned the tools of the modern investment analysis and become familiar with their application, in practice.
Prerequisites	
Course contents	Investment decisions under certainty, Investment decisions under uncertainty, Mean-variance portfolio analysis, The Capital Asset Pricing Model, Factor models and the Arbitrage Pricing Theory, Bond Markets, The term structure of interest rates: theory and practice, Bond portfolio management and International capital markets and portfolio management.
Recommended reading	Bodie Z., A. Kane and A. Marcus (2009), Essentials of Investments Copeland T. and J. Weston and K. Shastri (2005), Financial Theory and Corporate Policy Danthine J. and Donaldson (2002), Intermediate Financial Theory Fabozzi, F., Kolm. P., Pachamanova, D and Focardi, S. (2007), Robust Portfolio Optimization and Management, Wiley. Fabozzi F. (2016), Bond Markets, Analysis and Strategies, Pearson Luenberger D. (1999), Investment Science
Teaching methods	Lecturing, laboratory practicals, tutorials and external seminars
Assessment methods	Written exam and assignments
Language of instruction	Greek / English

Course title	Quantitative Methods
Course code	m44105p

Type of course	Compulsory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	7,5
Name of lecturer	Demos Antonios, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The lectures target to familiarize the class participants with the basic theoretical principles and the understanding of financial models. The objective of the applications is to familiarize the students with the various estimation techniques, applied on real data, on the areas of Economics and Finance.
Prerequisites	At least one undergraduate course in Econometrics and/or Introduction to Statistics.
Course contents	Random Variables. Covariance-Correlation dependence of random variables. Hypothesis Testing. Linear Regression and hypothesis testing. Economic Applications, with emphasis on CAPM. Transformations of random variables and introduction of dummy variables. Misspecification (autocorrelation, heteroskedasticity). Economic significance of heteroskedasticity with emphasis on portfolios and fund formation. GMM and Maximum Likelihood. Binary dependent variables (Logit, Probit). Introduction to time series with emphasis on GARCH and VAR models.
Recommended reading	C. Heij, P. et al, Econometric Methods with applications in business and economics, Cambridge University Press. J. Johnston and J. DiNardo, Econometric Methods, McGraw-Hill E. Tzavalis Econometrics (in Greek) A. Demos: Financial Econometrics (in Greek)
Teaching methods	Lectures, where econometric notions and models are thoroughly presented. The applications part, where various econometric packages are employed such as, R (additional seminars), Stata, Eviews, etc. with real or simulated data
Assessment methods	20% written project 80% written exam.
Language of instruction	Greek/English

Course title	Banking and Risk Management
Course code	m44108p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	2nd
Semester/trimester	3rd
Number of credits allocated	6
Name of lecturer	Sapountzoglou Gerassimos, Associate Professor.
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>The course aims in deepening students' scientific knowledge and technical training in Banking cognitive areas.</p> <p>The course elaborates the banking system' intermediating function, measurement of its profitability & efficiency, as well as issues regarding the detection, measurement, management and immunization of banks' risks, such as: credit risk, interest rate risk, parity risk, liquidity risk, operating risk.</p> <p>Furthermore, specialization in issues, such as: evaluation of clients' credit worthiness, credit ratings and assessment models.</p>
Prerequisites	Quantitative Analysis Basics and Financial Analysis Basics.
Course contents	Economic Activity, Monetary and Credit System & Banking Intermediation. – Bank Products, Banking Procedures, Bank Accounts and Statements. - Profitability and Effective Bank Management: Behavioral and Profitability Bank Model, Bank Performance Indexes. – Introduction in Bank Risks. – The Credit Risk. – Credit Risk Measurement Models. – Evaluation of the Credit Worthiness, Credit Rating, Assessment Models. – The Bank Lending System. – The Interest Rate Risk, Measurement Models. – The Foreign Exchange (Parity) Risk, Measurement Models. – The Operational Risk. – The Liquidity Risk.

Course title	Financial Derivatives
Course code	m44107p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Topaloglou Nikolaos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>The aim of this course is to introduce students to the theoretical and practical aspects of financial derivatives.</p> <ul style="list-style-type: none"> • Specifically, the course examines the pricing and use of financial derivatives including options, forward contracts, futures contracts, swaps and credit derivatives. • The course will extensively focus on the theory and applications of derivatives in speculation and risk management. • Moreover, the course includes a computational demonstration of the pricing models with excel.
Prerequisites	

Course contents	The course covers the main financial derivatives: futures and futures on various underlying values. Options on shares, indices, currencies and futures. Interest rate swaps and foreign exchange. The focus of the analysis are pricing and hedging derivatives or derivatives positions by financial institutions. Special topics covered include, inter alia, the Black - Scholes model, binomial trees, hedging deltas, as well as various applications such as real rights in finance.

Paul Wilmott "Derivatives: The Theory and Practice of Financial Engineering," Wiley.
Teaching methods	Lectures, assignments
Assessment methods	Problem sets, assignments, exams.
Language of instruction	Greek/English

Course title	Corporate Finance
Course code	m44110p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	2 nd
Number of credits allocated	6
Name of lecturer	Pagratis Spyros, Assistant Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	Corporate Finance is one of the seven core courses of the program. Students taking this course should be able to:

	<ol style="list-style-type: none"> 6. Identify turning points in economic policy that could have a material impact on funding conditions and corporate decisions to access external financing. 7. Navigate in the new era of extraordinary policy interventions by central banks that have a profound impact on asset valuations and the cost of corporate financing. 8. Value investment projects, conduct capital budgeting exercises, and identify factors that affect corporate decisions to access different forms of financing. 9. Assess alternative ways of accessing capital markets. 10. Identify issues of first-order importance that are relevant to corporate financing, combine them to make informed decisions and negotiate funding terms with financiers.
<p>Prerequisites</p>	<p>The course <i>Capital Markets and Portfolio Management</i> is prerequisite.</p>
<p>Course contents</p>	<p>Session 1. A primer on money creation in a modern economy</p> <ul style="list-style-type: none"> • Quantitative Easing (QE) and asset valuations. • Quantitative Tightening (QT) and capital market turbulence. A view to the future. • Long-term refinancing operations, targeted operations, credit easing, outright monetary operations (OMT) and the Covid-19 pandemic emergency programs. <p>Session 2. Capital Structure: Optimal debt-equity choice.</p> <ul style="list-style-type: none"> • Empirical patterns of corporate financing and possible explanations. • Types of financial instruments and markets. • Modigliani-Miller irrelevance proposition. An options-based approach to debt and equity valuations. The weighted average cost of capital (WACC) and WACC fallacies. • Capital structure under financial frictions. Taxes, financial distress costs and the static trade off (STO) in practice. • Debt-overhang: The underinvestment problem and the role of financial restructuring. • Equity capital raising and the mechanics of rights issues. • Incentives, asymmetric information and the pecking-order of financing choices. <p>Session 3. Business plans: Risk, return, and free cash flow analysis</p> <ul style="list-style-type: none"> • WACC and the internal rate of return (IRR) in practice.

	<ul style="list-style-type: none"> • Data sources: Equity risk premium (ERP), marginal tax rates, sectoral betas and growth rates on operating income (EBIT). • Free cash flow analysis: Working capital, sunk costs, tax shields (amortization-depreciation and interest costs).
<p>Recommended reading</p>	<p><i>The course packet</i> contains an extensive set of self-contained slides (approx. 170 slides) that are structured in three main sections, following the section list above. It also includes articles from business press (that students need to follow closely). These are optional but recommended to those students without prior exposure to finance.</p> <p><u>Auxiliary textbooks:</u></p> <ol style="list-style-type: none"> 6. Brealey, Myers, and Allen. "Principles of Corporate Finance", McGraw-Hill, New York, NY. 7. Jean Tirole. "The Theory of Corporate Finance", Princeton University Press. 8. Financial Times (November 26, 2019), "Repo: How the financial markets' plumbing got blocked. Available at https://ig.ft.com/repo-rate/ 9. Norelli A. and B. Merrill, "Quantitative Tightening: Many Moving Parts," J.P. Morgan Asset Management (Nov 2, 2017). Available at: https://blog.jpmorganinstitutional.com/2017/11/quantitative-tightening-many-moving-parts/ 10. McLeay M, Radia A., and R. Thomas, "Money creation in the modern economy," Bank of England Quarterly Bulletin (2014 Q1). Available at: https://www.bankofengland.co.uk/quarterly-bulletin/2014/q1/money-creation-in-the-modern-economy
<p>Teaching methods</p>	<p>Lecturing will be supported by video presentations, in-class case analyses, and occasional invited lectures by market experts. Students are expected to be prepared for class at all times and to contribute to class discussions.</p>
<p>Assessment methods</p>	<p>The course is evaluated through one final exam that counts for 100% of the course grade. The final exam is closed books and closed notes and lasts for 2 hours. It covers material from the entire course, including occasional invited lectures. Students are encouraged to use a calculator for the exam. This element is geared towards assessing students' ability to present concisely and quantitatively credible solutions to explicit corporate finance problems.</p>
<p>Language of instruction</p>	<p>English/Greek</p>

Elective Courses

Course title	Companies' and Banks' Valuations, Mergers and Acquisitions
Course code	m44225p
Type of course	Elective
Level of course	Postgraduate
Year of study	2nd
Semester/trimester	3rd
Number of credits allocated	6
Name of lecturer	Liapis Konstantinos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>The objective of the course are the valuations and the mergers & acquisitions of companies and Banks. Issues such as: corporate finance, capital and alternative investments, financial reporting systems, business groups, capital structure and operations decisions, acquisition methods and strategies, corporate restructuring, stock valuations, terms of m&a's transactions and shareholders' agreements.</p> <p>The desired learning outcomes are a full understanding of the concepts, tools, and methods of valuing companies as well as technical mergers & acquisitions, they will also be able to apply the above knowledge, tools, and methods in practice.</p>
Prerequisites	Without being a prerequisite, an introductory course in Accounting or Financial Analysis would be helpful.
Course contents	<p>Thematic units of the course are:</p> <ul style="list-style-type: none"> • Valuation, financial analysis, and corporate financing. • Methods of capital structure, equity valuation and price changes in stock markets after changes in capital • Accounting forecasts, provisions, and adjustments to the financial statements • Business plans and proforma financial statements • The types, methods and techniques of mergers and acquisitions • Business Mergers and Inter-Corporate Investments • Consolidation accounting • Global operations, multinational corporations (MNEs) and banks (MNBs) • Decision making for equity investments • Mergers and acquisitions and corporate restructuring • Venture capital

Teaching methods	Lectures – discussions, case studies, methods’ applications using excel
Assessment methods	Homework’s per thematic unit, during the lectures: 40% of the final grade Final exam at the end of the course: 60% of the final grade.
Language of instruction	Greek and English

Course title	Credit Risk Management
Course code	m44213p
Type of course	Elective
Level of course	Postgraduate
Year of study	2nd
Semester/trimester	3rd
Number of credits allocated	6
Name of lecturer	Topaloglou Nikolaos, Professor

Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>By the course end, the students should be able to:</p> <ul style="list-style-type: none"> • Master the fundamentals of credit risk management as well of compliance to bank regulatory procedures. • Pricing of credit and interest rate derivatives • Master the fundamentals of hedging the interest rate risk using derivatives
Prerequisites	
Course contents	<p>The first section presents standard interest rates models. These are then used in practice to price option or futures on Treasury Bills and Bonds, as well as interest caps and floors. They can also be used to hedge against risky debt. Having introduced the above tools, the second section the course makes an introduction to the credit risk, credit ratings, estimation of default probabilities, calculates the credit risk on debt instruments, presents credit risky bonds, credit default swaps, futures and options on credit default swap spreads, options on swaps, and finally introduces the mortgage-backed securities. The latter can be found very useful for practitioners in the markets for their every day activities, while students will learn all the necessary tools for credit risk management.</p>

Teaching methods	Lectures, assignments
Assessment methods	Problem sets, assignments, exams.
Language of instruction	Greek/English

Course title	Financial Risk Management
Course code	m44214p
Type of course	Elective
Level of course	Postgraduate
Year of study	2nd

Semester/trimester	3rd
Number of credits allocated	6
Name of lecturer	Synodinos Ioannis
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The educational aim of the course is to provide an integrated overview of the models of asset dynamics for different risk types (Equities, Interest Rates, FX & Credit) and the key techniques of identification, measurement and management of financial risk.
Prerequisites	A working knowledge of basic financial and statistical concepts strongly recommended. Working knowledge of derivatives a plus.
Course contents	Part 1: review of basic concepts of securities and derivatives Part 2: theory of risk (statistics and metrics) Part 3: Value at risk: Historical simulation, parametric evaluation and Monte Carlo simulation
Recommended reading	Jorion, Value at Risk Luenberger, Investment Science Crouhy, Risk Management
Teaching methods	Lectures and worked examples. Spreadsheet with built-in calculators to be provided on-line
Assessment methods	2 extended exercises (0 – 20% of the grade each); 1 final exam (60% - 100% of the grade)
Language of instruction	Greek / English

Course title	Investments with statistical and computational methods and market microstructure
Course code	m44226p
Type of course	Elective
Level of course	Postgraduate
Year of study	1st
Semester/trimester	2nd
Number of credits allocated	6
Name of lecturer	Skouras Spyros, Professor

Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>In this course we will use statistical and computational tools to study several aspects of trading in modern financial markets;</p> <ul style="list-style-type: none"> · What statistical facts about financial markets are useful for investors. · How quantitative trading models are constructed, implemented and evaluated. · How markets are organised and how organisation affects trading costs. <p>We will discuss several major asset classes including cryptos. The syllabus covers both theoretical work and empirical work.</p>
Prerequisites	
Course contents	<p>Part 1: quant trading models, design and implementation</p> <ul style="list-style-type: none"> - Relevant statistical facts - Building a quant trading model: return forecasts, risk forecasts and trading cost estimates - Portfolio construction and portfolio evaluation <p>Part 2: modern market structure and related concepts</p> <ul style="list-style-type: none"> - Core concepts (e.g. liquidity, transparency) and basic market design issues (i.e. auctions versus dealerships) - How modern markets actually work and examples of recent innovations (e.g. dark trading regulation) - Algo and high-frequency trading <p>Part 3: current market issues and opportunities</p> <ul style="list-style-type: none"> - Cryptos, bitcoin and blockchain
Recommended reading	Bodie, Kane and Marcus, Investments Instructor's notes
Teaching methods	Lectures and assignment
Assessment methods	Written group assignment and individual examination
Language of instruction	Greek / English

Course title	Game Theory & Strategic Decisions: with applications in Economics
Course code	m44212p
Type of course	Elective
Level of course	Postgraduate
Year of study	2nd

Semester/trimester	3rd
Number of credits allocated	6
Name of lecturer	Gatsios Konstantinos, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The chief purpose of this course is to enable the student to set up, study and solve games, especially games that arise in business and economics. To acquire a taste of the type of situations we would be interested in as well as the type of questions we would be asking, think of the following “real-life” situation.
Prerequisites	It does not require knowledge of economics (or any other science), despite the fact that it is necessary for an in-depth understanding of many economic (and not only) problems. The use of mathematical tools in the course is also quite limited.
Course contents	This course is designed for people in business, for managers. It is as theoretical as necessary for providing an introduction to the science of game theory; and practical in that it offers many applications and case studies to make it attractive to managers in both the commercial and non-profit sectors, as well as to students in business.
Recommended reading	Prajit K. Dutta, <i>Strategies and Games, Theory and Practice</i> , MIT Press. Osborne, M: <i>An Introduction to Game Theory</i> , εκδ. Κλειδάριθμος. Gibbons, R: <i>A Primer in Game Theory</i> , 1992
Teaching methods	Lectures, assignments, laboratory sessions.
Assessment methods	75% Exams, 20% homework, 5% participation in the course
Language of instruction	Greek

Course title	Large Data and Statistical Learning
Course code	m44227p
Type of course	Elective
Level of course	Postgraduate
Year of study	2nd
Semester/trimester	3rd
Number of credits allocated	6

Name of lecturer	Papailias Fotis
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>After successful completion of this course the students must have a good understanding of:</p> <ul style="list-style-type: none"> • computational inference, • time series forecasting, • data features (seasonalities, nonstationarities, etc.), • how machine learning methods work (supervised and unsupervised machine learning). <p>Furthermore, students are expected to obtain the necessary skills to be able to:</p> <ul style="list-style-type: none"> • use scientific software and develop codes independently, • collect, handle and organise large panels of data, • visualise data and extract features, • apply machine learning techniques in practice and interpret the output in economic and finance applications.
Prerequisites	None formal pre-requisite, a basic level of maths/stats and econometrics is required.
Course contents	<p>This course is designed to introduce students to the concepts of large data handling and analysis with machine learning techniques. We start with computational analysis and inference and discuss the Monte Carlo, Bootstrap, k-fold cross-validation and recursive and rolling estimation methodologies. We provide a solid basis for time-series forecasting based on predictive linear regressions as well as using the Kalman Smoother. Next, we discuss large data handling techniques and discuss its features (seasonalities, nonstationarities). We discuss how unsupervised machine learning methodologies (k-means clustering, principal component analysis and dynamic factor analysis) could be applied in economics and finance forecasting applications (including the construction of Financial Conditions Indexes and Uncertainty Indicators). Next, we introduce the penalised regression methodologies of ridge, lasso and elastic net. We extend our discussion to unbalanced datasets and use bridge equations, MIDAS and U-MIDAS models as suggested remedies. Finally, our special topics include adaptive learning and modelling and applications of machine learning in portfolio selection.</p> <p>On top of our theory discussions, the course has a “hands-on” approach where all these methods applied in real data using the R Project for Statistical Analysis as the main scientific software.</p>
Recommended reading	<p>Main reading: supplied material.</p> <p>Supplementary readings include:</p> <ul style="list-style-type: none"> • James, G., Witten, D., Hastie, T., Tibshirani, T. (2013). An Introduction to Statistical Learning with Applications in R. Springer, New York.

Replacing Master Thesis

Course title	Topics in Banking
Course code	m44223p
Type of course	Replacing Master's Thesis
Level of course	Postgraduate
Year of study	2nd
Semester/trimester	4th
Number of credits allocated	10
Name of lecturer	Sapountzoglou Gerassimos, Associate Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The course aims in further deepening of students' scientific knowledge and technical training in Modern Banking cognitive areas. The course elaborates the Banking System's Special Issues, as well as topics regarding: Securitization Mechanisms, Procedures and Applications – Bank Valuation Models: Mergers and Acquisitions - Banks and Payments Systems: Settlement Risk & Clearing – Bank System Regulation and Supervision - Standards of Basel Accord I, II & III and Capital Adequacy – Bank Structure and Organization Charts – Bank Strategy and Business Plans - Banking System and Financial Crises.

Prerequisites	Banking and Risk Management
Course contents	Securitization Mechanisms, Procedures and Applications. – Bank Valuation Models: Mergers and Acquisitions. - Banks and Payments Systems: Settlement Risk & Clearing. – Bank System Regulation and Supervision - Standards of Basel Accord I, II & III and Capital Adequacy. – Bank Structure and Organization Charts. – Bank Strategy and Business Plans. Banking System and Financial Crises.

PART THREE: GENERAL INFORMATION FOR STUDENTS

GENERAL INFORMATION FOR STUDENTS

Athens University of Economics and Business is committed to providing not only high-quality education but also high-quality student services. Greek law defines the operation, organization and administration of University Student Clubs, which aim at improving the living conditions of the students and enhancing their social and intellectual growth through initiatives to promote participation and socialization.

To fulfill this objective the University ensures the necessary infrastructure for housing, meals and sports activities through the operation of a student refectory, library and reading rooms, and the organization of lectures, concerts, theatrical performances and excursions in Greece and abroad. Furthermore, in this same context, the University supports the development of international student relations, and organizes foreign language classes, computer/software literacy classes, and courses in modern Greek as a foreign language for foreign students and students of Greek origin.

Meals

In the main building of the University there is a refectory where all members of the university community can enjoy meals for free or by paying a minimum fee. Free meals are granted to those who meet special conditions (contact the AUEB Student Club for more information).

Medical Services, Insurance / Healthcare

Undergraduate, postgraduate and PhD students of the University who have no other medical and hospital care are entitled to full medical and hospital care in the National Health System with coverage of the relevant costs by the National Health Service Provider. Moreover there is a doctor whose office is located in the main building of the University and who offers services at certain specified times. In addition, the University offers mental health counseling, which is provided by a physician specialized in the treatment of mental health issues. More information can be found here <https://www.aueb.gr/en/content/health-care> .

Services/Facilities for Students with Special Needs

Athens University of Economics and Business ensures the facilitation of students with special needs for access to the university buildings through ramps, lifts and other equipment. There are also specific exam regulations for students with special needs.

In addition, the Library provides students with visual impairment with aids to access online the proposed reading lists of the courses taught at the University. In this context, the Association of Greek Academic Libraries has developed a multimodal electronic library called AMELIB. Entry to this service requires user authentication as well as username and password. More information can be found on the Library website at

<https://www.aueb.gr/en/lib/content/users-additional-needs> .

Student Financial Aid – Scholarships and Awards

Athens University of Economics and Business offers scholarships to undergraduate and postgraduate students in order to support them and to award and encourage excellence. The resources for these scholarships come from the Institution itself or from partnering organizations. More information about scholarships, according to the level of studies, can be found here <https://www.aueb.gr/en/content/scholarships>.

Library and Reading Rooms

The AUEB Library is the oldest economic academic library in Greece. Today the Library & Information Center, located on the first and second floors of the University's main building, serves the needs of all of the members of the University community. It is a member of the Hellenic Academic Libraries Association (Heal-LINK) and the Economic Libraries Cooperation Network.

In addition, three Documentation Centers operate within the Library:

- The European Documentation Center, which has been in operation since 1992,
- The Organization for Economic Cooperation and Development (OECD) Documentation Center, operating since 1997, and
- The Delegation Center of the World Tourism Organization (UNWTO), which has been hosting publications since 2004.

The Library & Information Center contributes substantially both to meeting the academic community's needs for scientific information and to supporting the educational and research needs of students, by providing access to the Library's:

- Printed collection of books and scientific journals
- Textbooks used in classes
- Collection of electronic scientific journals
- Collection of e-books
- Postgraduate dissertations that are produced at Athens University of Economics and Business and deposited in digital form in the PYXIDA institutional repository
- Sectoral studies
- Statistical series by national and international organizations
- Audiovisual material
- Reference material (encyclopedias, dictionaries)
- Collection of official government publications of the European Union, the OECD and others
- Databases on issues of relevance to the University
- Printed collections of other academic libraries

The Library lends all its printed collections, except for magazines and statistical series, in accordance with its internal rules of operation. The Library and Information Center offers reading rooms, computer workstations for visitors, photocopiers and printing machines, and interlibrary loan of books and journal articles from other academic libraries that are members of its network. More information can be found here <https://www.aueb.gr/en/library>.

International Programmes and Information on International Student Mobility

Athens University of Economics and Business actively participates in the Erasmus+ Program by promoting cooperation with universities, businesses and international organizations in the European Union (EU) as well as in the mobility of students, teaching and administrative staff. Within the

framework of this Program, the University collaborates with more than 240 partner European Institutions in the subjects that its Departments encompass. It is noteworthy that more than 8,000 students have participated in the "Erasmus" Program to date. Of these, approximately 4,500 AUEB students have attended courses at Partner Universities in Europe and about 3,500 foreign students have completed a period of study at AUEB received accreditation through the European Credit Transfer and Accumulation System (ECTS).

Finally, AUEB, adopting the internationalization and extroversion strategy, has been successfully participating in the Erasmus+ International Credit Mobility Program with the aim of developing international collaborations in education and research with Partner Universities in countries outside the EU via:

- a) student mobility,
- b) short-term teaching staff mobility, and
- c) teaching / administrative staff training mobility.

The Program was first implemented in the academic year 2015-2016, and since then a total of 52 students and staff members have moved to/from 8 Partner Institutions in countries outside the EU, such as USA, Canada, Singapore, Russia, South Korea and Armenia. More information can be found here <https://www.aueb.gr/en/erasmus>

Foreign Language Courses

Knowledge of foreign languages, a universally-accepted qualification, has become a necessity for effective participation in today's educational and professional reality. The University Student Club offers students the opportunity to attend foreign language classes held in English, French, German, Spanish, Italian and Russian. More information can be found here <https://www.aueb.gr/en/content/foreign-languages-university-student-club>.

Connections with the Job Market and Entrepreneurship

The University's Employment and Career Unit plans, coordinates and implements actions related to:

- a) Entrepreneurship and innovation
- b) Connecting students and graduates with the labor market
- c) Connecting the academic community with businesses
- d) Offering internships, and
- e) Supporting dissemination of research output.

The Employment and Career Unit is composed of two units:

- a) The Internship and Career Unit, which focuses on supporting AUEB students and graduates in their professional development. The Unit also offers consulting services to students and graduates regarding their professional and educational future.
- b) The ACEin Unit (Athens Center for Entrepreneurship and Innovation). Its goal is to support business ventures focused on implementing an innovative idea, developing a sustainable business effort or exploiting the results of research. At the same time, the Unit organizes actions that are part of a wider network between the Unit and the market in specific productive sectors.

More information can be found here <https://www.aueb.gr/en/dasta>

Athletic Activities

Students can participate in individual and team sports activities through the University's Department of Physical Education, which is staffed by University personnel, as well as a number of part-time instructors specialized in various sports. The University cooperates with the City of Athens Culture, Sports and Youth Organization and uses public and private sports facilities. More information can be found here

<https://www.aueb.gr/en/content/athletic-activities>

Cultural Activities

To fulfill its purpose of providing a multidimensional study experience at AUEB, the AUEB Student Club organizes various cultural activities through clubs or societies, in areas such as Theater, Traditional Dance, Choir, Photography, Cinema, Debating and Model United Nations (MUN). More information can be found here

<https://www.aueb.gr/en/content/cultural-activities>

Student Organizations and Clubs

Various student organizations and clubs are active within the AUEB community, including AIESEC, Erasmus Club, Investment Club, Entrepreneurship Club ThinkBiz, and others. More information can be found here <https://www.aueb.gr/en/content/student-clubs>

Alumni Network

Adhering to a long tradition of educating future top executives in the economic, social and political life of the country, AUEB is proud of the fact that thousands of its graduates hold leading positions in companies, organizations, research institutes and universities in Greece and abroad. Understanding the importance of developing and strengthening the bond with its graduates, AUEB created its Alumni Network, including a platform where all graduates of the University can register. The main goals of the Network are the connection of the graduates with their colleagues and former fellow students, and diffusion of information about activities, services and events in and around the University that concern them. More information can be found here <https://alumni.aueb.gr/en>

Volunteer Program

AUEB's Volunteer Program was launched in September 2017 as part of the University's strategy to promote social contribution. Since then it has brought more than 450 volunteers to for-impact organizations around Athens, implementing more than 50 volunteer activities.

The aim of "AUEB Volunteers" is to give members of the University community – students, faculty and administrative staff – the opportunity to experience volunteering and in this way to highlight the value of participation and contribution to society and the University, as well as to sensitize more citizens about crucial issues related to the United Nations Sustainable Development Goals. More information can be found here

<https://auebvolunteers.gr/english-intro/>

Quality Assurance

Athens University of Economics and Business implements a quality assurance policy in order to continuously improve the quality of its educational programs, research activities and administrative services, and upgrade the academic and administrative processes and the University's overall operations.

AUEB's Quality Assurance Unit (QAU) coordinates and supports all related activities including the administration of the University-wide teaching and course evaluation process by students across all programs. More information can be found here <https://aueb.gr/modip> .

Education and Lifelong Learning Center

The Center for Education and Lifelong Learning ensures the coordination and interdisciplinary cooperation among all University entities in the development of continuous education programs, which complement and upgrade the skills and competences of the program participants. These programs build on participants' earlier formal education, vocational training and professional experience. The aim is to facilitate job market integration, career and personal development. More information can be found here <https://www.aueb.gr/en/content/kedivim-opa>
