ACADEMIC AUTHORITIES

The rectorate authorities consist of the Rector and the Vice Rectors:

Rector

Professor Dimitris Bourantonis

Vice Rectors

Vice Rector of Academic Affairs and Personnel

Professor Vasilios Vasdekis

Vice Rector of Research and Lifelong Learning

Associate Professor Georgios Lekakos

Vice Rector of Financial Planning and Infrastructure

Professor Konstantinos Drakos

Vice Rector of International Cooperation and Development

Professor Vasilios Papadakis

School of Economic Sciences

Dean: Associate Professor Anastasia Miaouli

Department of International & European Economic Studies

Chair: Professor George Economides

Master's Program in Law and Economics in Energy Markets

Director: Asterios Pliakos

Contact details

Address: 47A Evelpidon Str. & 33 Lefkados Str., Athens, GR 113 62

ACADEMIC CALENDAR

ACADEMIC CALENDAR (FULL-TIME PROGRAM)

Fall Semester: 3/10/2022 - 27/11/2022

Christmas Recess: 23/12/2022 - 06/01/2023

Fall Semester Examination Period: 5/12/2022 - 18/12/2022 & 6/3/2023 - 19/3/2023

Spring Semester: 20/03/2023 - 28/05/2023

Easter Recess: 10-21/04/2023

Spring Semester Examination Period: 6/6/2023 - 18/06/2023

ACADEMIC CALENDAR (PART-TIME PROGRAM)

Fall Semester: 3/10/2022 - 27/11/2022

Christmas Recess: 23/12/2022 - 06/01/2023

Fall Semester Examination Period: 5/12/2022 - 18/12/2022 & 6/3/2023 - 19/3/2023

Spring Semester: 20/03/2023 - 28/05/2023

Easter Recess: 10-21/04/2023

Spring Semester Examination Period: 6/6/2023 - 18/06/2023

NATIONAL/BANK HOLIDAYS

Friday, October 28, 2022, The Anniversary of the “No”

Thursday, November 17, 2022, The Anniversary of Polytechnio

Friday, January 6, 2023, Epiphany

Monday, February 27, 2023, Clean Monday

AUEB’s OPERATIONAL STRUCTURE

The structure and operation of the Institution is defined by current legislation as in force. The Athens University of Economics and Business is under the supervision of the Ministry of Education, Research and Religious Affairs. Its governing bodies include:

The Governing Council

The Senate

The Rector

The Vice-Rectors

The Executive Director

Until the Governing Council assumes its duties, administration is exercised by the University’s Rector’s Council

AUEB’s ACADEMIC STRUCTURE

The Athens University of Economics and Business is structured by academic units of two (2) levels:

a) the Schools, and b) the Departments

Each School is structured by at least two (2) Departments, covers a domain of related scientific areas, and ensures the interdisciplinary approach to teaching and research between its departments. The School is responsible for supervising and coordinating the operation of the Departments and the educational and research work produced, in accordance with the Internal Operating Regulations.

The bodies of the School, according to Law 4957/2022 (A 141) as applicable are: a) the Dean and b) the Dean's Council

The Department is the University's fundamental academic unit and aims to advance a specific field of science, technology, letters and arts through education and research. The Department consists of all the members of the Teaching & Research Staff (DEP), the members of the Special Education Staff (EEP), the members of the Laboratory Teaching Staff (EDIP) and the members of the Special Technical Laboratory Staff (ETEP).

Bodies of the Department according to Law 4957/2022 (A 141) as applicable are: a) the Assembly, b) the Board of Directors, c) the Head/Chair and d) the Deputy Head/Chair.

The Athens University of Economics and Business consists of three Schools & eight Departments:

1. SCHOOL OF ECONOMIC SCIENCES

Department of International and European Economic Studies

Department of Economics.

2. SCHOOL OF BUSINESS

Department of Management Science and Technology

Department of Business Administration

Department of Accounting and Finance

Department of Marketing and Communication.

3. SCHOOL OF INFORMATION SCIENCE AND TECHNOLOGY

Department of Informatics

Department of Statistics

ADMINISTRATIVE BODIES OF POSTGRADUATE STUDY PROGRAMS

Competent bodies for the organization and operation of the Postgraduate Study Programs are:

- a) the Senate,
- b) the Assembly of the Department,
- c) the Coordinating Committee (CC), and
- d) the Director of the Postgraduate Program.

Especially for inter-departmental, inter-institutional and joint programs, the responsibilities of the Department's Assembly are exercised by the Curriculum Committee

UNIVERSITY STAFF

The University staff consists of the following categories:

- TEACHING STAFF:

- Teaching & Research Staff (DEP)
- Emeritus Professors
- Visiting Professors
- Special Education Staff (E.E.P.)
- Laboratory Teaching Staff (E.DI.P.)
- Special Technical Laboratory Staff (E.T.E.P.)
- Auxiliary Teaching Staff
- Teaching Fellows
- Scientific Faculty Members
- Adjunct Instructors
- Secondet Teachers

- ADMINISTRATIVE STAFF

SERVICES

The Athens University of Economics and Business provides both administrative and other services (meals, housing, library, sport facilities etc.) aiming at serving both its students and staff. More information on the organization and operation of the University's services can be found on the University's website (<http://www.aueb.gr/en>).

GENERAL DESCRIPTION OF THE UNIVERSITY

The Athens University of Economics and Business (AUEB), as a Higher Educational Institution, is a legal entity governed by public law and supervised by the Ministry of Education, Research and Religious Affairs.

AUEB is, in order of seniority, the third Higher Education Institution of the country and the first in the fields of Economics and Business Administration. Later, the scientific fields of Informatics and Statistics were added. Since its founding, in 1920, AUEB has a rich and noteworthy tradition of significant academic achievements that define the present and create excellent prospects for the future.

The University as a center of excellence, in academic research and teaching, is rated as one of the leading universities in its subject areas in Greece and one of the best internationally. The high level of its staff, the quality in teaching and research, the modern

curriculum/courses, but also the high demand of its graduates significantly enhance the University's brand name and reputation, in Greece and abroad. Detailed information on the study programs is provided in the study guides and departmental websites.

ADMISSION/REGISTRATION PROCEDURE

Chief Regulations of the University (including academic recognition procedures)

The regulations include, for example:

- The University's Internal Operating Regulations
- The Organization of Administrative Services
- The Regulations for the Operation of Postgraduate and Doctoral Study Programs
- The Internal Regulation for conducting postdoctoral research

AUEB'S ECTS COORDINATOR

The University's ECTS Coordinator is the Quality Assurance Chairperson, who ensures the University's compliance with the principles and rules of the European credit accumulation and transfer systems, supervises compliance and implementation and is responsible for the full recognition and transfer of credit units.

PART II: Information about the Master's Programme in Law and Economics in Energy Markets

A. GENERAL DESCRIPTION

The Master's Programme entitled "Law and Economics in Energy Markets" was established by the 10 July 2018 decision of the University Senate. The Programme is governed by the provisions of the Programme's Studies Regulations which were prepared pursuant to the decision of the Department's General Assembly on 16 October 2018 and relevant decisions of the University Senate, in accordance with Greek Law.

The academic degree

The Master's Programme awards an MSc in Law and Economics in Energy Markets.

Entrance requirements

To be accepted into the Master's Programme, students are required to have an undergraduate degree from a Greek Institution of Higher Education, or an undergraduate degree from a foreign Institution of Higher Education which has been recognized by the Hellenic National Academic Recognition Information Center, in accordance with the provisions of Greek law, as specified in the Programme's Studies Regulations.

In accordance with specifically defined provisions of Greek law, members of the staff categories of Special Teaching Staff, Laboratory Teaching Staff, and Special Technical Laboratory Staff are accepted into the Master's Programme in addition to the prescribed number of admissions. The Master's Programme accepts up to 50 students into the full-time programme and up to 50 students into the part-time programme every academic year. The Programme is designed to employ 26 teaching staff.

The Master's Programme in Law and Economics in Energy Markets is aimed at a wide range of candidates who are university graduates with different knowledge and different scientific backgrounds. Examples of individuals who might be interested in this Master's Programme are graduates in fields such as Economics, Business Administration, Finance, Political Science, Law, Public Administration, the Sciences, the Social Sciences, Engineering, or other fields, who have a scientific or professional interest in issues which relate to energy markets.

Furthermore, the Programme is designed to enable university graduates who want to complete their Master's studies as quickly as possible to study within the framework of the full-time programme. At the same time, it is also designed for executives in the private or public sector who – on the one hand, because of their professional career and development need to acquire the knowledge and skills offered by the Programme, but on the other hand, because of their professional obligations – will choose to complete their studies within the framework of the part-time programme.

A.1. Features of the Master's Programme in International and European Economic Studies

The Master's Programme in Law and Economics in Energy Markets includes the following fields:

→ European and International Energy Economics

→ European and International Energy Law

The purpose of the Programme is the promotion of knowledge and the development of interdisciplinary analysis and research in the area of energy markets.

A.2. Learning Outcomes of the Master's Programme in Law and Economics in Energy Markets

The Master's Programme aims to:

- ✓ Educate and train business executives to be capable of solving complex issues in the energy sector.
- ✓ Offer the Programme's students, who have primarily a legal or an economics background, a specialization that will enable them to work in Greek, European and international companies in the energy sector.
- ✓ Enhance the ability of the Programme's graduates to obtain employment in Greek, European and international markets, after having been well prepared to participate in European and international competitions.
- ✓ Provide the Programme's graduates the opportunity to pursue careers in the Greek public and private energy sector, by equipping them with the qualifications necessary to compete for responsible and management positions.
- ✓ Train students in the processes for shaping the policies and strategies of the European Union, in international negotiations in energy issues and in their implementation in the national context.
- ✓ Introduce students to the geopolitical dimension of energy, and to transnational logic and the need for supranational solutions that are mutually beneficial.
- ✓ Train students in the search for and development of methodological tools which combine environmental protection, sustainable energy development and the achievement of energy security, in a continuously changing international context.
- ✓ Prepare students so that they are able to understand energy developments and to design strategies and policies, as executives of public and international organizations and companies.
- ✓ Provide students with the opportunity to do internships at companies and to attend seminars held at companies within the energy sector.
- ✓ Organize visits for students to companies in the energy sector, to electric power generating plants, to networks that provide electricity and natural gas, and so forth.

A.3. Career Opportunities for Graduates

The objective of the Master's Programme is the scientific training of its students and the application of their knowledge and skills to current economic and legal issues that characterize modern energy markets in the international and European environment.

A key feature of the Programme is the combination of interdisciplinary training (interdisciplinary specialization with primary components in legal and economic sciences) and

practical experience in the analysis, planning and management of business action in the energy sectors, in the way that they are shaped, developed and operated in the national, European and international context.

Today there is a continuously growing demand for graduates, especially in the economics and legal sciences, with a postgraduate specialization in energy markets, who are called upon to operate in a constantly changing institutional and regulatory environment, at both the European and the global levels.

The Programme provides its students with the requisite fundamental economic and legal knowledge, as well as the ability to apply it, both to the operation of businesses in the globalized environment as well as to economic planning within the European Union.

A.4. Access to further studies

The Department of International and European Economic Studies (D.I.E.E.S.) of Athens University of Economics and Business offers the opportunity to conduct doctoral studies and research in areas that fall within the research interests and/or the field of studies of the Department.

The [Doctoral Programme](#) aims, on the one hand, to produce original, high-level scientific research and, on the other, to create scientists capable of contributing to the advancement of science, education and relevant applications. Graduates are well-prepared to hold responsible positions in the academic, research and business workplace, both in Greece and abroad.

A.5. Research and Teaching Labs of the Department

Due to increased needs for Lab usage in teaching, computer training and research, in addition to the computer services provided by the Computer Centre and the Centre of Network Management that operate University-wide, the Department of International and European Economic Studies operates the following labs providing additional computer infrastructure for all its members.

Laboratory for Monitoring and Analysing European Affairs (Eurolab)

Director: Professor A. Demos

Field of studies: The lab covers teaching and research needs in the field of International and European Economic Relations and particularly in the fields of: 1) Analysis in economic, political and legal developments in the European Union and other International Organizations, 2) Simulation and analysis of consequences of such developments for the Greek Economy and Law, 3) Promotion of research in the field of International and particularly European economic Relations.

Location: A 34, 3rd floor, Antoniadou Wing, Patision 76 building.

“Laboratory of International Economic Relations, LINER”

Director: Professor S. Kalyvitis

Field of studies: The lab serves teaching and research needs in the field of “International Economics” with an emphasis in International Trade and International Macroeconomics. Some of the fields covered are the international trade of goods and services, the international mobility of production factors, the relation between international trade and the environment, international trade agreements, exchange rates, international investment and foreign debt.

Location: A 42, 4th Floor, Antoniadou Wing, Patision 76 building.

“Research laboratory on Socio-Economic and Environmental Sustainability - ReSEES”

Director: Professor P. Koundouri

Field of studies: The lab serves teaching and research needs in the field of “Sustainable Management of Natural Resources and Energy: Economic, Econometric, Social and Political Aspects”. The main goal of ReSEES is the pursuit of excellence in conducting and presenting research on the environment, the natural resources and energy in different time and spatial scales. The research tools employed by ReSEES involve financial analysis, socioeconomic and econometric analysis, environmental valuation, political and institutional analysis, integrated environmental-economic modelling, life-cycle analysis, risk analysis, geographic information systems, game theory, development of computing tools and decision making.

Location: A 49, 4th floor, Antoniadou Wing, Patision 76 building.

A.6. Faculty

PROFESSORS

Ioannis Billias (on sabbatical leave)

BA in Economics, National and Kapodistrian University of Athens

MA in Economics, Athens University of Economics and Business

Ph.D. in Economics, University of Illinois, Urbana-Champaign

Dimitrios Bourantonis

BA in Political Science, National and Kapodistrian University of Athens

BA in Law, National and Kapodistrian University of Athens

Ph.D. in Political Science, University of Reading

Dimitrios Christopoulos

BA in Economics, Athens University of Economics and Business

Ph.D. in Economics, Panteion University of Social and Political Sciences

Antonios Demos

BA in Mathematics, National and Kapodistrian University of Athens
Postgraduate Certificate in Economics and Econometrics, Southampton University
MSc in Econometrics and Mathematical Economics, London School of Economics
Ph.D. in Econometrics and Finance, Birkbeck College, London University

George Economides

BA in International and European Economic Studies, Athens University of Economics and Business
MSc in Economics, University of York
Ph.D. in Economics, Athens University of Economics and Business

Panagiotis Hatzipanayotou

BA in Economics, Athens University of Economics and Business
MA in Economics, State University of New York, Stony Brook
Ph.D. in Economics, State University of New York, Stony Brook

Sarantis Kalyvitis

BA: Department of Economics, Athens University of Economics and Business
MSc in Economic Theory, Athens University of Economics and Business
Ph.D. in Economics, Athens University of Economics and Business

George Karydis (on sabbatical leave)

BA in Law, National and Kapodistrian University of Athens
M.A. in Law, Universite de Paris I- Pantheon Sorbonne
Ph.D. in Law, Universite de Paris I

Margarita Katsimi (on sabbatical leave)

BA in Economics, National and Kapodistrian University of Athens
MA in Economics, Birkbeck College, University of London
Ph.D. in Economics, Birkbeck College, University of London

Phoebe Koundouri

BA in Economics, University of Leicester
MPhil in Economics, University of Cambridge
Ph.D. in Economics, University of Cambridge

Chrysovallantou Milliou

BA in International and European Studies, University of Macedonia
MA in Economics, Tufts University
Ph.D. in Economics, European University Institute

Thomas Moutos

BA in Economics, National and Kapodistrian University of Athens
MA in Economics, McMaster University
Ph.D. in Economics, McMaster University

Georgios Pagoulatos

BA in Law, National and Kapodistrian University of Athens

MSc in Sociology, University of Oxford

DPhil in Politics, University of Oxford

Asterios Pliakos

BA in Law, Aristotle University of Thessaloniki

LLM in European Law, Nancy II

Ph.D. in Law, Strasbourg III

Spyros Skouras

BA in Economics, University of Cambridge

M.Sc. in Economics, Universitat Pompeu Fabra

M.A. in Economics, University of Cambridge

Ph.D. in Economics, European University Institute

Nikolaos Topaloglou

BA in Electrical and Computer Engineering, Technical University of Crete

MSc in Decision Aiding, Dauphine University

MA in Decision Science, Athens University of Economics and Business

Ph.D. in Finance, University of Cyprus

Panagiotis Tsakoglou

BA in Economics, Aristotle University of Thessaloniki

M.A. in Economics, University of Warwick

Ph.D. in Economics, University of Warwick

Spyros Vasilakis

BA in Economics, National and Kapodistrian University of Athens

MSc in Economics, Johns Hopkins University

Ph.D. in Economics, Johns Hopkins University

ASSOCIATE PROFESSORS**Spyros Blavoukos**

BA in International and European Economic Studies, Athens University of Economics and Business

MA in European Integration, University of Essex

Ph.D. in Government, University of Essex

ASSISTANT PROFESSORS**Pantelis Kammass**

BA in Economics, Aristotle University of Thessaloniki

MSc in Economics, Athens University of Economics and Business

Ph.D. in Economics, Athens University of Economics and Business

Panagiotis Konstantinou

BA in Economics, National and Kapodistrian University of Athens

MA in Economics, European University Institute
Ph.D. in Economics, European University Institute

Lampros Pechlivanos

BA in Economics, Aristotle University of Thessaloniki
MA in Political Economy, Boston University
Ph.D. in Economics, Boston University

Costas Roumanias

BA in Economics, National and Kapodistrian University of Athens
M.Phil in Economics, University of Oxford
D.Phil in Economics, University of Oxford

Evgenia Vella

BA in International and European Economic Studies, Athens University of Economics and Business
MSc in International and European Economics, Athens University of Economics and Business
Ph.D in Economics, Athens University of Economics and Business

PROFESSOR EMERITUS

Nikolaos Christodoulakis

BA, National Technical University of Athens (NTUA)
MPhil, University of Cambridge
Ph.D, University of Cambridge

Anastasios Xepapadeas

BA in Economics, National and Kapodistrian University of Athens
MA in Economics, University of Manchester
Ph.D. in Economics, University of Manchester

George Zanias

BA: Department of Economics, Athens University of Economics and Business
M.Sc. in Agricultural Economics, University of Reading
Ph.D./D.Phil. in Economics, Oxford University

A.7. External Scientific Associates

Georgios Anagnostaras

LLB, Faculty of Law, Aristotle University of Thessaloniki
LLM in European Legal Studies, University of Bristol, UK
Ph.D. in Law, University of Bristol, UK

Pantelis Vogiatzis

B.Eng. (Hons) in Environmental Engineering, School of Engineering, University of Salford, UK
MSc. in Law & Environmental Science, School of Law, University of Nottingham, UK
MSc. & DEA in International Environmental Treaties, International University of Andalusia, Spain
Ph.D. in EU Environmental Law, School of Law, University of Newcastle upon Tyne, UK

Christos Karydas

Dipl.Sc. Applied Mathematics and Natural Sciences, National Technical University of Athens (NTUA)

M.Sc. Energy Science and Technology, Swiss Federal Institute of Technology (ETH Zurich)

Ph.D. in Economics, Swiss Federal Institute of Technology (ETH Zurich)

Glykeria Sioutis

BA in Law, Faculty of Law, National and Kapodistrian University of Athens

DEA Droit Public, University Paris 2- Sorbonne

Ph.d. in Law, National and Kapodistrian University of Athens

George Halkos

BA in Economics, University of Piraeus

MSc in Project Analysis, Finance and Investment, University of York, UK

Ph.D. in Environmental Economics, University of York, UK

Nikolaos Chatzistamoulou

Ph.D. in Economics, Department of Economics, University of Patras

MSc. in Economics, Department of Economics, Athens University of Economics and Business

BSc in Economics, Department of Economics, University of Patras

Conrad Felix Michel Landis

BA in International and European Economic Studies, Athens University of Economics and Business

MSc in International and European Economics, Athens University of Economics and Business

Ph.D. in Finance, Athens University of Economics and Business

Konstantinos Dellis

BA in Economics, Athens University of Economics and Business

MSc in Economic Development and Econometrics, University of Manchester

PhD in Economics, University of Piraeus

Christianos Vasileios

Professor of European Union Law – Faculty of Law, University of Athens

PhD. University of Paris II, France

Attorney-at-Law, Athens Bar Association & Barreau de Luxembourg

A.8. STUDIES IN THE MASTER'S PROGRAMME

The Master's Programme is intensive and fulfills the provisions set out in the 13-8-2007 Ministerial Decree with regard to the implementation of the European Credit Transfer and Accumulation System.

The Programme offers:

- a **full-time programme** with studies lasting 12 months (three semesters of studies)
- a **part-time programme** with studies lasting 24 months (six semesters of studies)

The Master's Programme in International and European Economic Studies corresponds to a total of 75 credits in the European Credit Transfer and Accumulation System (ECTS). The Programme consists of 10 courses, all of which carry an equal number of ECTS credits, as well as the writing of a Master's dissertation. Each of the 10 courses corresponds to 6 ECTS credits while the Master's dissertation in combination with the seminar is equivalent to 15 ECTS credits. The Programme also includes preparatory courses which are offered each year in September.

Each trimester students follow the compulsory courses for that trimester, and choose elective courses from those offered that trimester. During their overall course of studies, students must pass examinations in five compulsory courses and five elective courses.

A.9. The curriculum (with ECTS credits)

The curriculum of courses that are taught and examined is divided into compulsory and elective courses. The following overall rules apply:

- Modification of the curriculum and redistribution of courses between semesters can be effected through decisions of the authorized bodies, in accordance with the Postgraduate Studies Regulations.
- The curriculum is offered both as a full-time programme and as a part-time programme. The redistribution of courses in the part-time programme is decided upon by the authorized bodies and will be included in the Postgraduate Studies Regulations of the Master's Programme.
- The duration of the full-time programme is 12 months, which includes two semesters of course studies and the time to write the Master's dissertation. The duration of the part-time programme exceeds that of the full-time programme by two semesters of course studies. The semesters of study are defined by law.
- The teaching and the examination of the courses in the Master's Programme, as well as the writing of the Master's dissertation, can be conducted in either the Greek or the English language, while the bibliography and relevant articles will be drawn from both Greek and international sources.

A.10. Compulsory Courses

1. Economic analysis for business decisions (6 ECTS)
2. Energy Law (6 ECTS)
3. Energy Economics (6 ECTS)
4. Legal aspects of Competition and Market Regulation (6 ECTS)
5. Project Appraisal in Infrastructure and Energy and Risk Management (6 ECTS)
6. Regulatory Compliance (6 ECTS)

A.11. Elective Courses

1. International Law (6 ECTS)
2. Environmental Law (6 ECTS)
3. Environmental and Natural Resource Economics (6 ECTS)
4. Sustainable Development and Limited Carbon Economies (6 ECTS)
5. Structure and Functioning of the European and Global Economy (6 ECTS)
6. The Legal Aspects of the Energy Union and Climate Action (6 ECTS)
7. International Investment and Trade Disputes Settlement (6 ECTS)
8. Special Topics on Energy Policy (6 ECTS)
9. Modeling Energy, Environment and Economy (6 ECTS)
10. Design and Regulation of Energy Markets (6 ECTS)

A.12. Master's Dissertation

- The master's dissertation is mandatory and is prepared individually or by pairs of two students, under the supervision of a member of the teaching faculty of the Department. It corresponds to 15 ECTS credits and, in combination with the dissertation seminar.
- The master's dissertation must meet accepted postgraduate standards in terms of length and quality. This means that, through the dissertation, the student is expected to demonstrate thorough knowledge and competence in the relevant scientific field. For this reason, the dissertation must include (to some extent) an element of theoretical and/or empirical originality, in the form of collection and/or processing of data and/or development of a theoretical model, based on the courses taught in the Programme.
- The master's dissertation is written by students in the full-time programme during the summer months of their year of study, and by students in the part-time programme during the summer months of their second year of study. The dissertation must be submitted by the beginning of September by students in the full-time programme, and by the beginning of September of their second year by students in the part-time programme. A student who fails to complete the dissertation within the abovementioned time limits is entitled to an extension of six months, following a recommendation by the faculty Supervisor presenting the reasons justifying such an extension, in order to graduate within the prescribed timeframe for completing studies in the Programme.

Content, format and length of the Master's dissertation

- The Master's dissertation is to be written in either Greek or English. If the dissertation is written in Greek, the title must be translated into English and submitted to the Secretariat of the Programme.

- The total length of the dissertation should be at least 15,000 words and not more than 20,000 words, not including the Bibliography and any relevant tables, unless the faculty Supervisor has approved a change in the minimum or maximum word limit.
- The recommended font is Times New Roman 12 and the recommended line spacing is 1.5.
- The structure of the dissertation is the following:
 - a) The first page (title page) includes the information below:
 - Athens University of Economics and Business
 - School of Economic Sciences
 - Department of International and European Economic Studies
 - The title of the Master's dissertation
 - The student's full name
 - The phrase: "*A Master's dissertation submitted in partial fulfillment of the requirements for the Master's Degree*"
 - The date of submission
 - b) The second page contains the names of the faculty Supervisor and the faculty Examiners, as well as the sentence: "*I, (student's name), hereby declare that the work prepared and presented in this submitted Master's dissertation is exclusively mine. Any information and material contained in and drawn from other sources has been appropriately cited and referenced in this dissertation. In addition, I am aware that if it is found that what I have declared here is not correct, my degree can be revoked immediately at any time.*"
 - c) The third page contains the table of contents.
 - d) The fourth page contains a summary of the Master's dissertation (up to 200 words). The Summary must be provided in both Greek and English and very briefly presents an overview of the work (main objectives, research methodology, key findings).
 - e) Next comes the body of the dissertation, which should have the following indicative general structure:
 - **Chapter 1 - Introduction**
The Introduction includes a delineation of the topic and clarification of the research question(s), a brief presentation of the research methodology and material, along with an outline of the structure of the dissertation and the main findings.
 - **Chapter 2: Literature review**

The review of the literature (indicative length: 5-10 pages) is directly linked to the dissertation topic. It is usually the first section that the student prepares, given that it helps to clarify the research framework and define the objectives of the work.

- Chapter 3: **Theoretical/analytical framework and research methodology**
This chapter provides a deeper theoretical and/or analytical background of the work, along with the research methodology.
- Chapter 4: **Empirical data** (can be expanded into additional chapters)
The chapter on empirical data includes presentation of the specific elements of quantitative and/or qualitative analysis used in the particular dissertation (for example, analysis of quantitative data and econometric analysis, or analysis of legal and other texts, or case studies, or comparative research, and so forth).
- Chapter 5: **Analysis – Discussion**
- Chapter 6: **Conclusions**
The Conclusions (1-2 pages) summarize the main findings of the work.

Clearly the above structure is indicative; it should be adapted to fit the specific characteristics of the particular area of study and research topic, in **direct consultation with the faculty Supervisor**.

f) Appendices (if any)

g) The last section is the Bibliography, which should follow the specifications of one of the internationally accepted styles for academic work, such as the Harvard style or the APA style. The final version of the bibliography (list of references) incorporates all of the sources of information which have been used in developing the topic and which have been cited in the dissertation.

Presentation, examination and grading of Master's dissertations

- The dissertation is graded by a three-member Examining Committee (which is composed of the faculty Supervisor and two faculty Examiners) before whom the student is obligated to defend the dissertation. The presentation and defense of the dissertation lasts for 20-30 minutes. The student is required to have prepared a small number of slides with bullet points/keywords upon which the oral presentation will be based. Questions from the Examining Committee can be posed either during the presentation or afterwards.
- The dissertation must be given to the faculty Supervisor for final remarks and comments at least 20 days before the final submission date. In this version all the

previous remarks and comments of the Supervisor need to have been addressed. Only after final approval is given will it be possible to submit the work and only within the deadline set by the Secretariat. An extension of a small number of days will be given only for proven reasons of force majeure (such as health).

- Once the faculty Supervisor approves the final draft of the dissertation, the work is submitted to be checked by the Turnitin plagiarism detection service. Depending on the result of the check, the student either makes further corrections or proceeds with final submission of the work to the Examiners (in electronic form, after consultation with the faculty Supervisor).
- Following the final submission of the dissertation to the Examining Committee, the student consults with the three-member Committee in order to determine the day and time for the presentation and defense of the dissertation before the Committee.
- The evaluation of the dissertation is based on strict scientific criteria with regard to its originality, depth and analysis, composition and quality. Following the defense, an evaluation report is prepared which is signed by the Examining Committee. In order for the grade for the dissertation to be awarded, the evaluation report is submitted by the faculty Supervisor to the Secretariat of the Master's and Doctoral Studies of the School of Economic Sciences.
- If the student does not receive a passing grade on the dissertation, the student can be re-examined one additional time, not earlier than three months nor later than six months after the original examination. If the student does not receive a passing grade on the dissertation from the second examination, the relevant provisions of the law and the Studies Regulations are applied.
- After the dissertation is awarded a grade, the student electronically submits it to the Institutional Repository "PYXIDA" (<http://www.pyxida.aueb.gr/index.php?lang=en>) of the University Library, using the self-archiving process. This electronic deposit of the dissertation is a prerequisite to being awarded the Master's degree.

BASIC PRINCIPLES

- Throughout the preparation of the dissertation, the student should maintain contact with the faculty Supervisor and follow the Supervisor's suggestions and directions.
- Files sent by the student should include the student's name and the title of the dissertation in the name of the file. Do not use general file names such as "Dissertation" or "Dissertation final".
- Prior to submitting any files, the files should first be carefully checked for spelling, syntax and typing mistakes. Files containing mistakes will be returned to the student – without comments – for correction.

- Students must attend the seminars regarding preparation of the Master’s dissertation that are organized by the Programme and the dissertation supervisors. It is also recommended that students follow the relevant educational seminars that are organized by the University Library. Follow the link below for more information: <https://www.aueb.gr/el/lib/content/v-enotita-ekpaideytikon-seminarion-vivliothikis>
- The student must cite every source of information that was used in writing the dissertation and bears full responsibility if the dissertation is checked and found to contain extensive copying through any method, whether before or after the completion of the dissertation (**plagiarism**).

A.13. Distribution of Courses by Trimester*

*By decision of the Departmental General Assembly and approval of the University Senate, classes can be added to or removed from the detailed programme of studies.

Courses can be redistributed between semesters by decision of the Coordinating Committee of the Master’s Programme.

A.14. The Erasmus Programme

The “Lifelong Learning Programme” – ERASMUS offers undergraduate and graduate students the opportunity to study for a period in universities of the European Union that have a bilateral agreement with our Department that includes the equivalent level of studies (undergraduate, postgraduate or doctoral). For details regarding the process of student mobility, you can visit the Athens University of Economics and Business web page <https://www.aueb.gr/en/erasmus>.

In order to obtain recognition for a course which a student passed at another university within the framework of the ERASMUS Programme, the total number of ECTS credits and the grade that the student received at the university where the class was taught are transferred. The grade is included in the calculation of the student’s overall grade point average for the degree.

Students are selected for the Erasmus+ Programme based on the following criteria:

- The student’s grade point average on the date of application for the programme
- The total number of courses which the student has passed
- The total number of first-year courses which the student has passed
- The type of courses which the student has passed in relation to the curriculum of the host university
- The student’s level of knowledge of the language of instruction of the host university
- The priority ranking which the student declares for the host university
- A personal interview

A.15. Final examinations

The final evaluation in each course is conducted through written examinations and/or assignments. By decision of the Departmental General Assembly and then by recommendation of the Coordinating Committee, the final evaluation can alternatively be conducted through oral examinations.

A.16. Regulations regarding exams and assessment/grading

1. The composition of the final grade for each course is determined by the course instructor(s) and can include individual or team assignments. Participation in the examinations on the designated date announced by the Programme is compulsory.
2. The grading scale ranges from zero (0) to ten (10), in increments of half or whole units. A grade of 5 and above is deemed to be a passing grade.
3. A student who fails to appear for the exam in a given course on the specified date, without excuse, loses that examination period, is considered to have failed the given course, and must appear for the re-take exam for that course. The re-take exams for each trimester are held approximately ten days after the regular exams for each trimester. The maximum grade that can be received on re-take exams is seven (7).
4. Class attendance is compulsory. A student whose absences exceed 1/3 of the teaching hours in a given course is considered to have failed the course and must repeat it the very next time that it is offered.

A.18. Scholarships and Awards

TUITION FEES

The tuition fees for attending the Master's Programme are set at 4,200 euros and are paid in installments over the course of the Programme (full-time and part-time). The students who are entitled to an exemption from tuition fees are defined by the relevant Greek law.

SCHOLARSHIPS

→ Scholarships granted by the Department of International and European Economic Studies

The Master's Programme can award scholarships or excellence awards to postgraduate students who excel during the course of their studies, based on academic criteria, in accordance with a

A.19. Awarding the Master’s Degree and the Grade for the Degree

1. Postgraduate students complete their studies and are awarded the Master’s Degree when they have fulfilled all the requirements of the Programme, which are successful examination in the courses of the Programme, approval of the dissertation and payment of tuition fees.
2. The final grade for the MSc degree is the average of the grade for the graduate courses and the grade for the dissertation.
3. The grade awarded to the Master’s degree (MSc) certifies the successful completion of the postgraduate student’s studies. The MSc degree which the student is awarded carries the designation of Good, Very Good, or Excellent which correspond to: a) “Excellent” from 8.51 to 10; b) “Very Good” from 6.51 to 8.50; and c) “Good” from 5 to 6.50.
4. The diploma for the Master’s degree is a public document. The type, the format, the contents as well as the authorized signatories are determined by decision of the University Senate.
5. The Master’s degree is awarded at a special public ceremony which is attended by the Rector or his/her legal alternate, the Dean of the School, the Director of the Master’s Programme, the President of the Department, and all of the postgraduate students who have fulfilled the requirements for the awarding of the Master’s degree.
6. During the time period preceding the awarding of the degree, the Secretariat of the Master’s Programme issues a certificate of completion of studies which indicates the date of graduation.

B. Description of Individual Courses

Course title	Energy Economics
Course code	m42103s
Type of course	Compulsory
Level of course	Postgraduate
Semester/trimester	Winter Semester
Number of credits allocated	6
Name of lecturer	Dr. Christos Karydas,

Objective of the course (preferably expressed in terms of learning outcomes and competences)	Students will learn fundamental economic concepts and their application to energy markets. After successful completion of the course, with the help of, both, economic theory and applied methods, students will be able to discuss in an educated manner issues relevant to energy industries, economic effects of energy policy, and the role of energy industry in shaping our sustainable development.
Prerequisites	Basic calculus (school calculus), basic MS Excel, English level B2-C1
Course contents	This course applies fundamental economic concepts on energy issues using practical tools from theory and empirical analysis. The following concepts will be covered: energy supply/demand, energy economic modelling using MS Excel, energy markets (fossil fuels, electricity and renewable energy sources), market failures and environmental challenges, technical progress and sustainable development, market-based and non-market-based energy policy instruments, and regulation of energy industries.
Recommended reading	Pindyck and Rubinfeld, "Microeconomics", 8 th or 9 th ed.
Teaching methods	Weekly lecture, graded exercise sets
Assessment methods	Netting written exam with exercise sets
Language of instruction	Greek/ English

Course title	Energy Law
Course code	m42102s
Type of course	Compulsory
Level of course	Postgraduate
Semester/trimester	Winter Semester
Number of credits allocated	6
Name of lecturer	Professor Asterios Pliakos
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of the course is to look into the study of the basic principles which guide the establishment of the internal market of energy, the role of the Member States as regards the protection of the general economic interest, the place of the consumers in the market, the institutions controlling the market and the judicial protection of the parties involved in the market.
Course contents	1. Energy and the constitutional framework of the European Union

	<p>2.The application of the EU Treaties: atomic energy, internal market and energy union.</p> <p>3.The liberalization of the energy market. EU directives and the law 4001/2011.</p> <p>4. EU Directive 2019/944: the reformation of the energy market and the National plan for energy and climate</p> <p>5. The Institutions</p> <p>6.The judicial protection</p>
Recommended reading	<p>1.Ek. Iliadou, Energy law, 2021 (in Greek)</p> <p>2. A. Pliakos, EU law, 2018 (in Greek)</p> <p>3. Th. Fortsakis/N. Farantouris, Energy Law, 2016 (in Greek).</p> <p>4. Hunter/Herrera/Crossley/Alvarez (ed.), Routledge Handbook of Energy Law, 2020.</p> <p>5. K. Talus, Introduction to the EU Energy Law, 2016.</p> <p>6.Journal “Energy and Law” (in Greek).</p>
Teaching methods	<p>Overview and analysis of the current EU legal framework and policy.</p> <p>Assessment and approach of case studies in the energy sector.</p>
Assessment methods	<p>Written/oral examination-written assignments.</p>
Language of instruction	<p>Greek/English</p>

Course title	Environmental and Resource Economics
Course code	m42211s
Type of course	Elective
Level of course	Postgraduate
Semester/trimester	Winter Semester
Number of credits allocated	6
Name of lecturer	<p>Prof. Phoebe Koundouri - Professor</p> <p>Dr. Landis Conrad Felix Michel – Adjunct Lecturer</p> <p>Dr. Dellis Kontantinos – Adjunct Lecturer</p>
Objective of the course	<p>Understanding of:</p> <p>(a) the economic causes of environmental degradation relating to market imperfections like externalities, public goods, institutional weaknesses</p> <p>(b) The Corporate Sustainability Reporting Directive, ESG criteria and SDGs</p> <p>(c) benefit cost analysis and valuation techniques that are used to better</p>

	<p>determine the efficient management of environmental and natural resources</p> <p>(d) the alternative policies needed to improve the management and protection of the environment and its natural resources.</p>
Prerequisites	Introductory economics
Course contents	This course provides a general introduction to the economics and management of natural resources and the environment. The emphasis is on the underlying theory and methodology with references to current challenges like climate change and the global fisheries crisis. The course provides an introduction to the principles of environmental and natural resource economics including cost benefit analysis. The course introduces the theory of renewable and depletable resources and looks into the principles of designing environmental policy with specific reference to atmospheric pollution, water pollution and climate change.

Teaching methods	Lectures and discussion
Assessment methods	Written exams including multiple choice questions
Language of instruction	Greek

Course title	International Law
Course code	m43217s
Type of course	Elective
Level of course	Postgraduate
Semester/trimester	Winter Semester
Number of credits allocated (based on the student workload required to achieve the objectives or learning outcomes)	6
Name of lecturer	Dr. Georgios Anagnostaras, Adjunct Lecturer
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of the course is to look into the study of the sources and the rules of International Law, to demonstrate the specificities of this area of law and its hierarchical relationship with the national legal orders and national law, to explain the meaning and the operation of the International Organizations by studying the most important of them, to explain the functioning and the importance of the international judicial bodies. Particular emphasis is given to the International Law of the Sea and to the International Energy Law.
Prerequisites	
Course contents	Subjects of International Law, sources of International Law, jus cogens, hierarchical position of International Law, International Custom, International Treaties, the State (elements, territorial sovereignty, territorial integrity, acquisition of land, succession of States), the International Court of Justice, international responsibility of the State, diplomatic protection, International Law of the Sea (territorial waters, continental shelf, exclusive economic zone), diplomatic and consular relations, International Energy Law.

Course title	Legal Aspects of Competition and Market Regulation
Course code	m42104s
Type of course	Compulsory
Level of course	Postgraduate
Semester/trimester	Spring Semester
Number of credits allocated	6
Name of lecturer	Pliakos Asterios, Professor
Objective of the course	The aim of the course is to provide basic knowledge of the EU competition rules, in relation to the energy markets. It analyzes the basic concepts of the main forms of competition restriction, through a critical evaluation of certain judicial decisions. It gives special weight to state interventions in the energy markets, guided by the relevant Directives for the liberalization of the electricity market. The course aims to provide the appropriate tools for comprehending the operation of the regulated markets and is a necessary step for further specific interdisciplinary analysis of the energy markets.
Course contents	Concept of EU Competition rules, main forms of competition restriction, application of competition rules in the energy markets. Control of anti-competitive state measures. State aid rules and energy markets.
Recommended reading	Whish R. and Bailey D, Competition law, Oxford University Press, 9th edition , 2018. Course title	The Legal Aspects of the Energy Union and Climate Action
Course code	m42214s
Type of course	Elective
Level of course	Postgraduate
Semester/trimester	Winter
Number of credits allocated	6
Name of lecturer	Professor Asterios Pliakos - Dr. Pantelis Vogiatzis
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The Energy Union means making energy more secure, affordable and sustainable. It will facilitate the free flow of energy across borders and a secure supply in the EU. It will lead to a sustainable, low carbon and environmentally friendly economy, putting Europe at the forefront of renewable energy production, clean energy technologies, and the fight against climate change. The Energy Union strategy builds further on the 2030 Framework for Climate and Energy, the European Energy Security Strategy, the EU Green Deal as well as the outcome of the Paris Agreement on Climate Change.
Prerequisites	
Course contents	<p>ENERGY UNION [P. Vogiatzis]</p> <ul style="list-style-type: none"> • Energy Union: Strategy and fundamental principles • Energy security • Clean Energy for All Europeans package • Regulation on the governance of the energy union <p>CLIMATE ACTION [A. Pliakos]</p> <ul style="list-style-type: none"> • Combating climate change as an objective of EU environmental policy (relations with other policies and horizontal environmental clause). • International environmental agreements as a source of EU law: The Paris Agreement. • European Green Deal, European climate law and implementation measures. • Climate justice

Course title	Environmental Law
Course code	m42210s
Type of course	Elective
Level of course	Postgraduate
Semester/trimester	Winter Semester
Number of credits allocated	6
Name of lecturer	Glykeria Sioutis, Professor Asterios Pliakos, Professor
Objective of the course	The aim of the course is to look into the study of the EU and Hellenic Environmental Law, especially as regards the fundamental principles of

environmental protection, the judicial protection, the role of the Aarhus Treaty and the constitutional nature of the environmental protection.

Course contents

EU ENVIRONMENTAL LAW (A. PLIAKOS)

1. The fundamental principles of EU Environmental law
2. The precautionary principle and the principles that the preventive action should be taken, that the environmental damage should as a priority be rectified at the source and that the polluter should pay.
3. Integration of the environmental protection into the EU policies, the EU Directives, the application of the EU Directives in Greece, the 8th environment action programme.
4. Judicial protection, application and interpretation of Aarhus treaty.

HELLENIC ENVIRONMENTAL LAW (G. SIOUTIS)

1. The constitutional protection of the Environment: Legal analysis of Article 24 of the Greek Constitution, the legal issue of a constitutional *right* to the natural environment, the legal binding and the required actions of the State, access to the Courts and legal interest of individuals and legal entities, exploration of the legal meaning of the "Forest" and protection of Forestial ecosystems. Study of relevant jurisprudence.
2. Basic principles of the environmental protection under EU and Greek law: The precautionary principle, the preventive principle and the polluter-pays principle. Study of relevant jurisprudence.
3. Economic development and environmental protection: the conflict between the right to the environment and the right to economic freedom and to the free economic development. Sustainable development under international, EU and Greek law. Study of relevant jurisprudence.
4. Zoning and urban planning and environmental authorization of all projects and activities. Zoning plans, environmental impact studies, approval of environmental conditions, strategic environmental impact studies, ratification of environmental conditions by law. Study of relevant jurisprudence.

Teaching methods	Analysis and interpretation of the current EU and Hellenic legal framework. Study and analysis of the EU and national law case law. Examination of case studies.
Assessment methods	Written/Oral Examination.
Language of instruction	Greek

Course title	Regulatory Compliance
Course code	m42106s
Type of course	Compulsory
Level of course	Postgraduate
Semester/trimester	Spring Semester
Number of credits allocated	6
Name of lecturer	Dr. Pantelis Vogiatzis, Visiting Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	Companies in the energy sector can be subject to uncertainties, which may stem from exogenous factors or from internal actions. Often, uncertainty is synonymous with the definition of risk. By systematically monitoring uncertainty, it is possible to adopt appropriate organizational and technical measures in a timely manner to reduce risks and exploit opportunities. For this reason, the implementation of an effective compliance system is a key component of the management of a value-based company, as it supports its sustainable development.
Course contents	<ul style="list-style-type: none"> • The notion of compliance with the energy regulatory framework • Compliance within the governance system • Data Protection (legislation and processes towards conformity) • The Compliance Programme • Code of Conduct and Business Ethics • Quality Management System • Technical and Organizational measures to ensure compliance
Recommended reading	<ol style="list-style-type: none"> 1. Kotsalis L., Menoudakos K., General Data Protection Regulation (GDPR), 2nd edition 2021 2. A. Iliadou, Energy Law, 2021. 3. Oikonomou A., Compliance & Ethics, 2017
Teaching methods	Overview of the current regulatory and legal framework. Analysis of the best available techniques and methods. Assessment and approach of case studies in energy companies.

Assessment methods	Written/Oral Assessment
Language of instruction	Greek/English

Course title	Project Appraisal in Infrastructure and Energy and Risk Management
Course code	m42105s
Type of course	Compulsory
Level of course	Postgraduate
Semester/trimester	Spring Semester
Number of credits allocated	6
Name of lecturer	Evgenia Passari, Visiting Professor
Objective of the course	The course presents the methods of investment evaluation at the level of firm and national economy, as well as the ways of their application. After completing of the course students will be able to conduct financial, economic and social evaluation and as well risk analysis of investment programs in the real economy.
Course contents	The course includes: Basic concepts in investment appraisal; Identification and measurement of cash flows; Compound Interest, present and future value; Investment appraisal criteria; The cost of capital in project appraisal; Risk analysis (Sensitivity analysis, Monte Carlo simulations, Qualitative analysis); Project appraisal at the level of firm and national economy; Feasibility analysis; Financial analysis; Financial efficiency and sustainability; Economic analysis; Accounting prices and conversion factors; Social analysis. Lectures with 'PowerPoint presentations' and selective use of the literature according to the progress of the lectures
Recommended reading	<ul style="list-style-type: none"> - European Commission Guide to COST--BENEFIT ANALYSIS of investment projects, European Commission, 2014-2020. - Stephen A. Course title	International Investment and Trade Disputes Settlement
Course code	m42215s
Type of course	Elective
Level of course	Postgraduate
Semester/trimester	Spring Semester
Number of credits allocated	6
Name of lecturer	Christianos Vasileios, Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The aim of the course is to provide specialized training on the status of investment protection and the process of resolving relevant disputes. The students of the program become familiar with the study and analysis of specific cases and comprehend the way and the procedural framework for their solution. The knowledge they acquire is useful both for understanding the reconciliation and consultation processes and for the judicial mechanisms and enforcement measures of the relevant decisions.
Course contents	<ul style="list-style-type: none"> ➤ WTO legal framework - Dispute Resolution Mechanism - Dumping and subsidy control mechanisms. ➤ International framework for the protection of foreign investment (Bilateral and Multilateral Treaties, EU Agreements with non-member states) - Energy Charter Treaty (ECT) -CETA. ➤ Dispute settlement mechanisms between states and foreign investors - Arbitration systems - CETA hybrid mechanism for resolving investment disputes - Towards a Multilateral Investment Court System.

Assessment methods	Translated with www.DeepL.com/Translator (free version) Papers, case studies, current issues
Language of instruction	Final Exam, Working paper Greek

Course title	Modeling Energy, Environment and Economy
Course code	m42217s
Type of course	Elective
Level of course	Postgraduate
Semester/trimester	Spring Semester
Number of credits allocated	6
Name of lecturer	Professor George Halkos
Objective of the course (preferably expressed in terms of learning outcomes and competences)	Diagnosis of physiology of environmental problems. Understanding of appropriate energy policy for solving modern environmental problems. Adopt appropriate environmental policies and tools with awareness of both the dimensions of environmental problems and the necessary energy policy. Upon successful completion of the course, students are expected to have a proven knowledge and understanding of issues related to the economic operation of natural resources, the impact of economic activity on environmental resources, modeling the relationship between environment, economy and energy.
Course contents	The course analyzes quantitative and qualitative approaches to the modeling, management and utilization of natural resources and the environment in the private and public sectors, supporting arguments for solving environmental and economic problems. Models of partial and general equilibrium, production factor modeling, energy market and labor in dynamic models, issues of endogenous development and technological progress are examined. Special issues concern the construction and analysis of alternative scenarios of climate change and structural changes in the energy system, economy and environment.

Recommended reading	Selective use of bibliography / articles according to the progress of the lectures. Distribution of notes at the end of lectures.
Teaching methods	Lecture presentations (Power Points), solution of relevant exercises and discussion of case studies.
Assessment methods	The marking of the course is done either by examination (100%) or by examination (70%) and participation and preparation of an assignment (30%).
Language of instruction	Greek/English

Course title	Sustainable Development and Limited Carbon Economies
Course code	m42212s
Type of course	Elective
Level of course	Postgraduate
Semester/trimester	Spring Semester
Number of credits allocated	6
Name of lecturer	Phoebe Koundouri Professor
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>The course aims to understand and use methods for decision making and implementation in the field of sustainable (green and blue) technological and social solutions, as well as investments, which can be used to transition to a sustainable economy and society.</p> <p>More specifically: (1) in the application of the criteria of the "EU Taxonomy for Sustainable Investments (2019)" for the selection and financing of sustainable investments, (2) in the assessment of the value of natural resources and their ecosystem services, (3) in the integration this value in Cost-Benefit Analysis, (4) in creating financial instruments to finance sustainable investments, (5) in the transition from innovation to entrepreneurship, (6) in the "Systems Innovation Approach" methodology for co-shaping sustainable solutions / investment with all stakeholders involved.</p>
Prerequisites	Undergraduate degree in any natural or social science
Course contents	1. Understanding and applying the criteria of "EU Taxonomy for Sustainable Investments (2019)" for the selection and financing of sustainable investments.

2. Valuation of the value of natural resources and their ecosystem services. Total Economic Value (GVA), use and non-use values. State-of-the-art Quantitative Valuation Methods: Revealed Preferences in Substitute or Existing Markets, Declared Preferences and Hypothetical Markets, Selection Experiments. The methods will be presented using examples from real projects.
3. Completion of this Total Economic Value in the Cost-Benefit Analysis (CBA) and presentation of all the stages of the Financial and Socio-economic CBA. The methods will be presented using examples from real projects.
4. Detailed presence of financial instruments for financing sustainable investments and solutions: taxes, marketable emissions permits, green bonds, green loans, etc. The tools will be presented using real policy examples.
5. Presentation of strategies for the transition from innovation to entrepreneurship. Development of Business Plans for Start-ups. Strategies will be presented using examples from real start-ups.
6. Detailed presentation of the state-of-the-art methodology "Systems Innovation Approach" for the co-formation of sustainable solutions / investments with all stakeholders involved. The method will be presented using examples from real projects.

PART III: STUDENT INFORMATION

GENERAL STUDENT INFORMATION

The Athens University of Economics and Business provides not only high-quality education but also high-quality student services. The adoption of the Presidential Decree 387/83 and Law 1404/83 defines the operation, organization, and administration of Student Clubs at Universities, which aim at improving the living conditions of the students and enhance their social and intellectual wellbeing through engagement and socialization initiatives.

To fulfill this objective the University ensures the required infrastructure for housing, meals, and sports activities through the operation of a student restaurant, reading rooms, library, organization of lectures, concerts, theatrical performances, and excursions in Greece and abroad. Further in this context, the University supports the development of international student relations, organizes foreign language classes, computer/software literacy classes, and courses in modern Greek as a foreign language for foreign students and expatriated Greek students.

Detailed information on meals, housing, fitness, foreign languages, cultural activities, scholarships, financial aid, is provided on the website of AUEB's Student Club at <https://lesxi.aueb.gr/>

Electronic Services

A significant number of procedures related to both attendance and student care are carried out electronically through applications of the University or the Ministry of Education and Religious Affairs. All applications are accessible with the same codes (username & password).

• E-mail account:

Detailed instructions for using the Webmail Service are provided at <https://www.aueb.gr/el/content/webmail-manual>

• Electronic Secretariat (Student Register)

The Electronic Secretariat application is the information system through which students can be served by the Department's Secretariat via the web.

• Wireless network

Using their personal codes, students have access to a wireless network in all areas of the Athens University of Economics and Business buildings/campus. [WI-FI Connection | Athens University of Economics and Business \(aueb.gr\)](#)

• E-Learning Platform – ECLASS

The Open eClass platform is an integrated Electronic Course Management System and is the proposal of the Academic Internet (GUnet) to support Asynchronous Distance Education Services.

Instructions are provided at <https://eclass.aueb.gr/info/manual.php>

Medical Services, Insurance / Healthcare

Undergraduate, postgraduate and PhD students at the University who have no other medical and hospital care are entitled to full medical and hospital care in the National Health System with coverage of the relevant costs by the National Health Service Provider. A psychiatric counseling service also operates at the University, staffed with a physician specializing in the treatment of mental health issues.

More information at <https://www.aueb.gr/en/content/health-care> .

Services/Facilities to Students with Special Needs

The Athens University of Economics and Business ensures the facilitation of students with special needs, through the design, implementation, and environmental adaptations, for access to the university building facilities. In the main building there are specially configured lifting machines, ramps, and elevators. There are also special regulations for conducting exams for students with special needs.

The Athens University of Economics and Business has established a Committee for Equal Access for people with disabilities and people with special educational needs. The Commission is an advisory body and submits recommendations to the competent bodies for the formulation and implementation of the policy of equal access for persons with disabilities and persons with special educational needs.

Through the Library services, students with physical disabilities are granted electronic access to the recommended Greek bibliography of the courses taught at the University. In this context, the Association of Greek Academic Libraries (SEAB) has developed a multimodal electronic library called AMELib.

More information is available at <https://www.aueb.gr/el/lib/content/amea-atoma-me-idiateires-anages>.

Studies Advisor: [Professor Asterios Pliakos](#)

Library and Study Rooms

The Library & Information Center of the University operates at the University's main building. The AUEB Library is a member of the Hellenic Academic Libraries Association (Heal-LINK), the European Documentation Centers Europe Direct and the Economic Libraries Cooperation Network (DIOBI).

Three Documentation Centers operate within the library:

- The European Documentation Center
- The Organization for Economic Cooperation and Development (OECD) Documentation Center
- The Delegation Center of the World Tourism Organization (WHO)

The library contributes substantially both to meeting the needs for scientific information of the academic community and to supporting studying and research. The library provides access to:

- printed collection of books and scientific journals,
- course books used in modules,
- collection of electronic scientific journals& books

- postgraduate theses and doctoral theses that are produced in Athens University of Economics and Business and deposited in digital form at the PYXIDA institutional repository
- sectoral studies
- statistical series by national and international organizations
- audiovisual material
- information material (encyclopedias, dictionaries)
- databases on the topics used by the University
- printed collections of other academic libraries

The library lends all its printed collections, except for magazines and statistical series, in accordance with its internal rules of operation. The Library and Information Center offers reading rooms, computer workstations for visitors, photocopiers and printing machines, and interlibrary loan of books and journal articles from other academic libraries that are members of its network. More information at <https://www.aueb.gr/en/library> .

International Programs and Information on International Student Mobility

Athens University of Economics and Business is actively involved in the Erasmus+ Program since 1987 promoting cooperation with universities, businesses, and international organizations of the European Union (EU) as well as in the mobility of students, teaching, and administrative staff.

In addition, strengthening its internationalization objectives, it creates new opportunities through the Erasmus+ International Mobility Program. Within this framework, mobility scholarships are granted through the State Scholarships Foundation (SSF) to incoming and outgoing students of the three study cycles, according to the funding approved each year by the State Scholarship Foundation for the University. Outgoing students have the possibility to spend a period of study at a Partner Institution outside the EU with full academic recognition through the application of the ECTS credits system <https://www.aueb.gr/en/content/erasmus-programme>

Connecting with the Job Market and Entrepreneurship

D.A.STA.O.P.A. (<https://www.aueb.gr/el/dasta>) is the administrative unit of the University that plans, coordinates and implements the actions of the Athens University of Economics and Business in the following areas:

- a) development of entrepreneurship and innovation
- b) connecting students and graduates with the labor market
- c) connecting the academic community with businesses
- d) student internship programs and,

e) supporting research utilization actions

Student Associations

Various student clubs and associations are active within the community of the Athens University of Economics and Business. (<https://www.aueb.gr/el/content/student-associations>).

Alumni Network

Adhering to a long tradition of educating future top executives in the economic, social, and political life of the country, AUEB is proud that thousands of its graduates hold leading positions in companies, organizations, research institutes and universities in Greece and abroad. Understanding the importance of developing and strengthening the bond with its graduates, AUEB created its Alumni network including a platform <https://alumni.aueb.gr> where all graduates of the University can register. The main objectives of the Network are the connection of the graduates with their colleagues and former fellow students, and diffusion of information about activities, services, and events in and around the University that concern them.

Additional information on Clubs and Alumni Associations is available on the website <https://www.aueb.gr/el/content/organizations-and-associations-of-students-and-alumni>

Volunteer Program

Within the framework of its strategies, the "AUEB Volunteers" Volunteering Program was launched in September 2017. The aim of the Program is to highlight important social issues and the value of participation and practical contribution, but also to raise community awareness regarding the 17 UN Sustainable Development Goals. Actions are developed around two pillars: (a) actions addressed to AUEB's Community, which have as their main objective the maintenance of the quality of the University's infrastructure based on their aesthetics and functionality, and (b) actions addressed to Greek society. (<https://auebvolunteers.gr>).

Quality Assurance

The Athens University of Economics & Business implements a quality assurance policy to continuously improve the quality of its study programs, research activities and administrative services, and upgrade the academic and administrative processes and the University's operations. The Quality Assurance Unit (MODIP) operating at AUEB coordinates and supports evaluation processes. Particularly the quality assurance of the educational process is achieved using the module/teaching evaluation questionnaire completed by AUEB students. (<https://aueb.gr/modip>).

Training and Lifelong Learning Center

The Center for Training and Lifelong Learning (**KEDIVIM**) is an AUEB unit which ensures the coordination and interdisciplinary cooperation in the development of training programs, continuing education, training and in general lifelong learning, which complement, modernize and/or upgrade knowledge, competences, and skills, acquired from formal education, vocational

education and initial vocational training systems or from work experience, facilitating integration or reintegration in the labor market, job security and professional and personal development. (<https://www.aueb.gr/el/content/dia-vioy-mathisi-kedivim-opa>).
