Norwegian School of Economics

A dynamic binomial model with application to the propensity to use tax amnesty

ΤΕΤΑΡΤΗ 3/10/2018

13:00

**ΑΙΘΟΥΣΑ Τ108, 1ος ΟΡΟΦΟΣ
ΝΕΟ ΚΤΙΡΙΟ ΟΠΑ, (ΤΡΟΙΑΣ 2)**

ΠΕΡΙΛΗΨΗ

In the talk, a model to study the effects of announcement and implementation of international tax information agreements on the propensity to use the Norwegian tax amnesty will be introduced and studied. The model is based on the binomial distribution with a dynamic for which the initial value has to be estimated. The model is also extended to a panel version.

ABSTRACT

In the talk, a model to study the effects of announcement and implementation of international tax information agreements on the propensity to use the Norwegian tax amnesty will be introduced and studied. The model is based on the binomial distribution with a dynamic for which the initial value has to be estimated. The model is also extended to a panel version.
